Cabinet Width T
Minimum cabinet depth: 500mm
Minimum distance between upper and lower rails: 200mm
Minimum installation height: 200mm

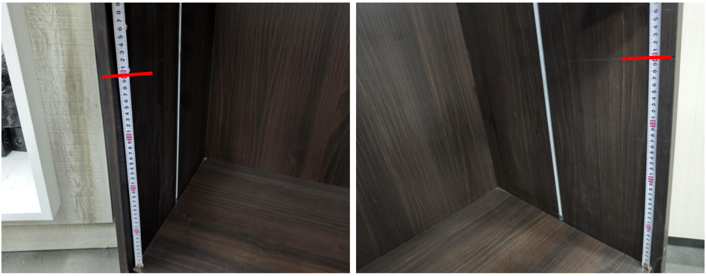
BV2.0 SERIES Installation Requirements: Width is in accordance with standard cabinet width; Minimum cabinet depth≥500mm; Minimun installation height(distance between rails)≥200mm(280mm for deep leather basket).

STEP

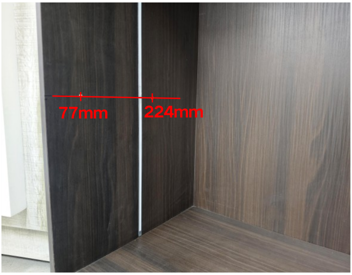
- 02 -

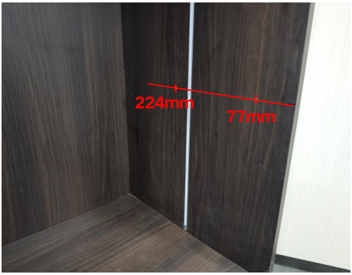
Installation of Rails

The rails in BV2.0 series adopt a universal fit design. Specific operations are as follows:

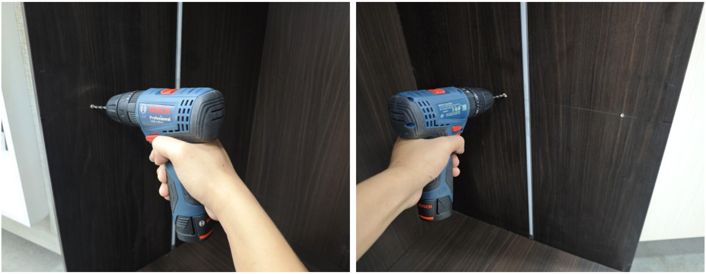


Before installation, ensure both left and right rails are at the same height and aligned horizontally.

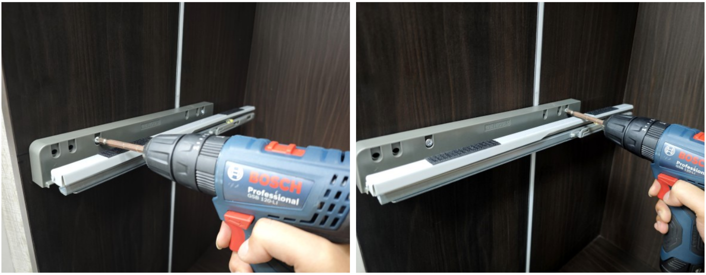


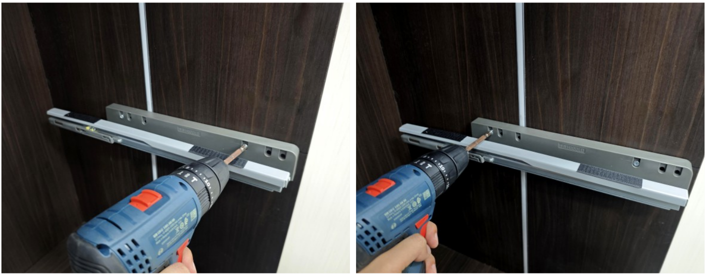


On the pre-leveled horizontal reference line (left/right rails aligned), pre-drill the 1st reference point 77mm from cabinet edge, then drill the 2nd point 224mm from the 1st reference.

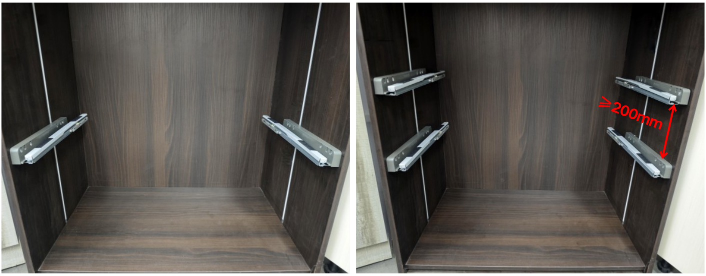


Pre-drill holes at two reference points(left /right).





Align the 3rd and 6th mounting holes of the rail with the two pre-drilled holes (left/right sides), then secure them using self-tapping screws. Once fixed, tighten all remaining screws to complete the installation.



After rail installation is completed, ensure a minimum clearance of ≥200mm between multi-level rails.
