MUSE SERIES-Accessories Storage Box

600mm	700mm	800mm	900mm
706641	706642	706643	706644

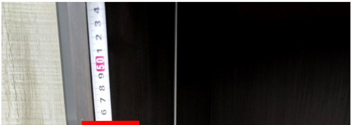
MUSE SERIES Installation Requirements:

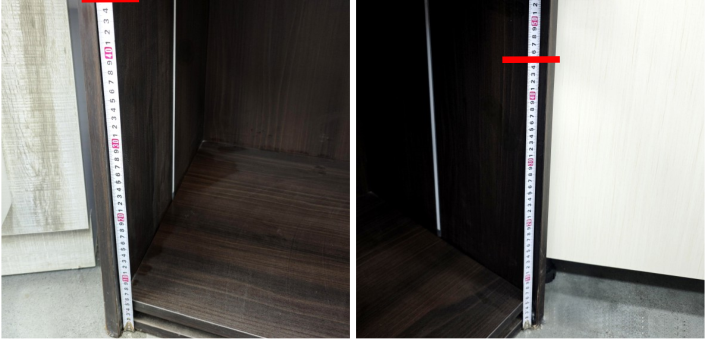
Width is in accordance with standard cabinet width; Minimum cabinet depth≥500mm; Minimun installation height(distance between rails)≥200mm.

STEP
- 02 -

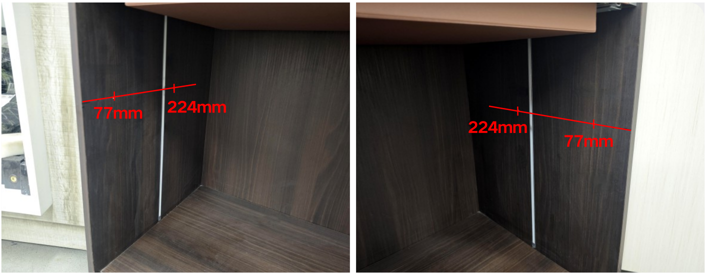
Installation of Rails

The rails in Muse series adopt a universal fit design. Specific operations are as follows:

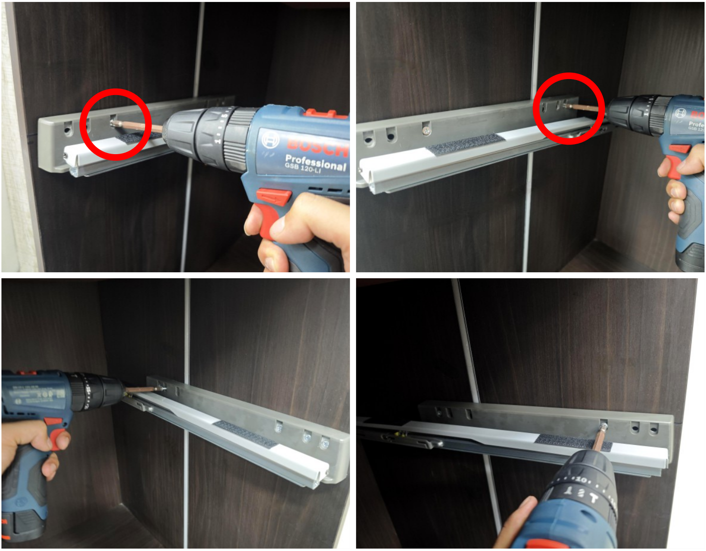




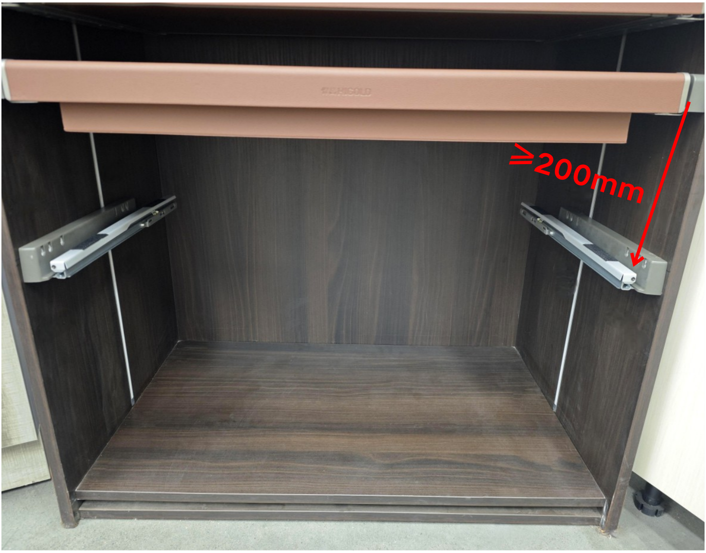
Before installation, ensure both left and right rails are at the same height and aligned horizontally.



On the horizontal reference lines at the same height on the left and right, pre-drill the first reference point 77mm away from the cabinet edge, then pre-drill the second reference point 224mm away from the first reference point.



Align the third and sixth mounting holes of the rail with the two pre-drilled holes (left/right sides), then secure them using self-tapping screws. Once fixed, tighten all remaining screws to complete the installation.



After rail installation is completed, ensure a minimum clearance of ≥200mm between multi-level rails.
