email: sales@cambia.it

The standard motherboard is designed for 8 or 16KF modules Power feed and system connector to DCS are integrated in the motherboard, which results in noticeable space savings in the interface cabinet. The power source has a redundant design, increasing the reliability of the system. The operating status of the power supply is monitored and reported via led and relay output.

The KF modules are interfaced to the motherboard himself by using 2- to 6- pin coded cable connectors.(FSY...) The motherboard configuration is mounted on a stable metal plate. There are two brackets, on the back for mounting the board quickly and easily to a standard DIN rail in accordance with DIN EN 50022 or similar.

### 1. Model with 16 modules

- Optional second connector for redundant connection to PLC
- Adapter
- Main printed circuit board
- Customer specified system plug to PLC
- Terminal strip (removable) for redundant power supply and message contact for monitoring the power, optional breakage and short circuit monitoring.
- Cable connector (FSY) between the modules and the PCB
- Metal base plate with brackets for mounting on DIN rail
- Connector for HART communication

# Installations instructions

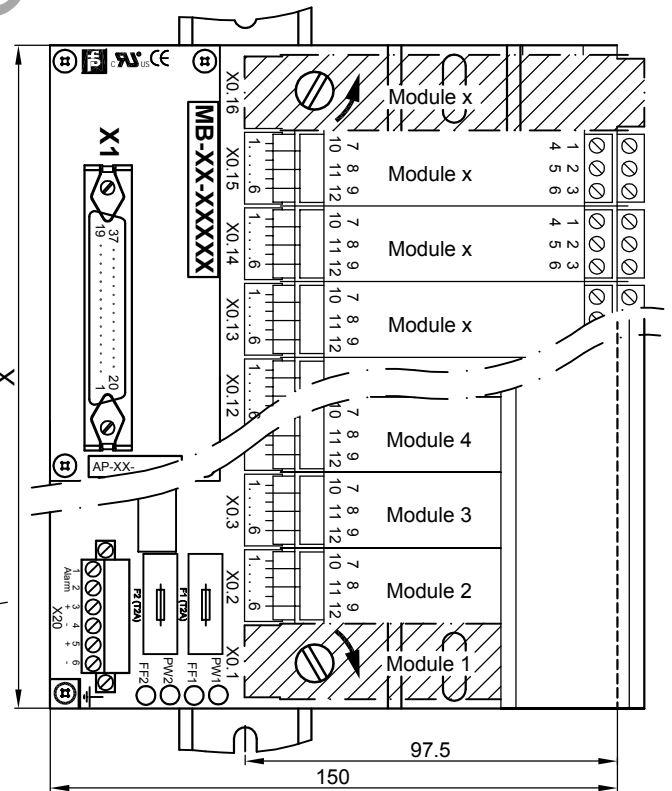

1. Take away first and last module.  
Operate the screw to fix the board on to the DIN rail.

2. Turn the part as shown the stopper!

3. Set the board on the DIN rail. Turn the screw as shown till the board is fixed.  
(Arrows are showing direction how to turn for fixing the board)

(Proposal)

## Test certificate

On June 15<sup>th</sup> 1999 have been tested succesfully the Pepperl+Fuchs Interface-Boards with Triconex I/O cards. Type names of each device see table below.

**It was a 100 % test. Each channel was tested by connecting the accordingly signal to the field side of P+F modules and was shown by a test programme on Triconex system monitor.**

Triconex I/O card	P+F Motherboard	P+F module	Signal
3503E / 3505E * <sup>2)</sup>	ISTA-TR-DI-350X-118289	KFD2-SH-Ex1.T.OP (1-channel module)	32 point. Digital Input 24 V DC
	ISTA-TR-DI-SRLB-350X-122110	KFD2-SR2-Ex1.W.LB (1-channel module)	16 point. Digital Input 24 V DC
	ISTA-TR-DI-SR2-350X-118271* <sup>1)</sup>	KFD2-SR2-Ex2.2S (2-channel module)	16 + 16 point. Digital Input 24 V DC
	ISTA-TR-DI-SR2-350X-118272* <sup>1)</sup>	KFD2-SOT2-Ex2 (2-channel module)	16 + 16 point. Digital Input 24 V DC
3504E / 3564 * <sup>2)</sup>	ISTA-TR-DI-SR2-35XX-118278	KFD2-SR2-Ex2.2S (2-channel module)	32 + 32 point. Digital Input 24 V DC
	ISTA-TR-DI-SOT2-35XX-118279	KFD2-SOT2-Ex2 (2-channel module)	32 + 32 point. Digital Input 24 V DC
