## Why Choose Fullstar ?

### Production Capability

2 plants & 1 industrial zone  
28,000 square meters covering land  
1,200 workers  
100 x 40HQ containers per month

### Advantage

Competitive price  
High-quality products  
On - time delivery  
Excellent service  
Effective management in factory

### Sales Team

Young and promising  
High educated  
Good control on English  
Full - experienced on exporting procedure

Continuous learning : FULLSTAR always organize stuffs to participate in training

### Quality

All products comply with ISO manufacturing regulations and process (ISO9001:2008,ISO13485) strictly, and conform to international standards as CE, Nelson,TYPE 5&6,FDA registered, etc.

FULLSTAR NON-WOVEN,  
**FULLSTAR NON-WOVEN**  
 PRODUCTS CO.,LTD.,LTD.,

We, FULLSTAR NON-WOVEN PRODUCTS CO.,LTD. are equipped with two advanced domestic production lines for spunbonded polypropylene material making, one is 2.4m, the other one is 3.2m. Annual capacity can reach 4,000 tons. Available material weights range from 10-250 g/m<sup>2</sup>. Maximal material width is 3,200mm. Spunbonded polypropylene enjoys very good uniformity and comfort, it consists of continuous filament, with good tensile strength and elongation. Different spunbonded polypropylene is able to be made by customizing to the required various colors, weights and material width.

### Antistatic Performance

Slight antistatic level and give converting facility only, will reduce dust adsorption and layers adhering.

# COMFORTSTAR - FR

Hot Selling: Fire Retardant Coverall - Stop Burning After 5 Seconds!

**Material:** 60% Micro Polyethylene Synthesized With 40% Polyester Fiber, 60g/m<sup>2</sup>. It is anti-sticking, anti-high temperature and more soft / comfortable / breathable than the regular material. It is the latest technology of spunbonded, bicomponent synthetic fiber non-woven fabric. And this is a thinner, lighter material than hazard resistance, excellent barrier protection from particulates and even better water resistance than any other non-coated fabrics with good performance in anti-static.

**Advantages:** The main advantages of ComfortStar-FR are durability, Physical hazard resistance, hydrostatic resistance and affordability. And the most important property pertains to which is Fire Retardant, safer and widely used for industrial protection. So, where these characteristics are Key considerations for both Particulate and light liquid splash and fire-resistant Protection.

**Styles:** New Style Coverall Standard. Waist (0.7cm rubber band). Elastic shuts on the hat (if with hoodie), wrists, and ankle (0.3cm rubber band). And extra-wide zipper to the neck-throat. Multiple styles are available:

- Collar, open wrists and ankles, elastic waist, zipper front
- Collar, elastic wrists/ ankles/ waist, zipper front
- Hood, elastic wrists/ ankles/ waist, zipper front
- Hood and Boots, elastic wrists/ waist, zipper front

**Colors Available:** White, Yellow, Orange, Blue

## Applications of ComfortStar-FR:

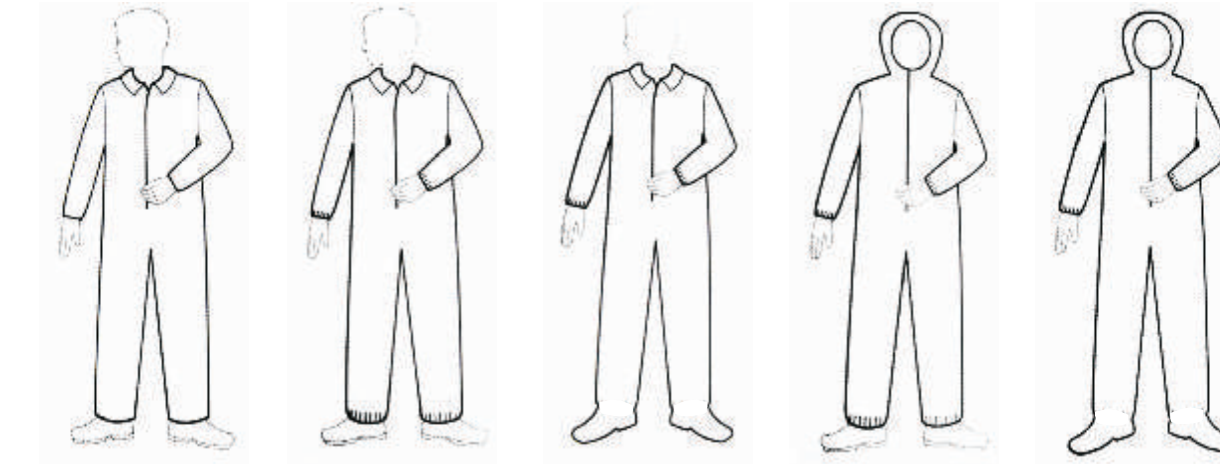

Suitable for who and where?	
	-Clean room service -Hazardous chemical area -Pharmaceutical / chemical -Painting and / or paint related environments -Food processing -Asbestos environments -Emergency and toxin leaking administration -Agriculture and / or toxin involved
