

- Thanks for the public demands for reducing waste and building a sustainable ecosystem. We' re going green and taking care of the earth. Making a truly " **eco-friendly** " or " **environmental friendly** " products is the goal of Ecomagicware, which make an effort to **reduce the waste, reuse the plant fiber and recycle the tableware and cups.**
- Being environmental friendly means having a lifestyle that are better for the environment. The products of Ecomagicware come from plant fiber, we use it again before being waste. The reusable rice husk will be biodegradable in 2 years, and bamboo, corn starch or other plant fibers are gone in 2 or 3 years. The plant fiber tableware and cups have been the alternatives to the plastic, glass and porcelain. The data from the tests is that one glass bottle will be biodegradable more than 1 million years, one plastic bottle has been gone in 450 years.
- Ecomagicware make **the sustainable and recyclable plant fiber products**, the rice husk and plant fiber cups which take away tea, coffee or hot chocolate replacing the disposable coffee cups. Reduce the waste and reuse it again if he plant fiber and rice husk tableware replace the glass or plastic tableware. Being biodegradable without any pollution if the plant fiber tableware and rice husk cups are broken or garbage.
- **Eco friendly, we' re going green and taking care of the earth.**

Ecomagicware Products
