KITCHEN

Melamine • Lacquer • PVC finished...

- ✓ Wood veneer door, the door is MDF with solid wood paper. In the production, the solid wood surface is generally made of concave and convex shape, and the exterior paint is sprayed, thereby maintaining the color of the log and the shape is beautiful.
- ✓ The lacquer door kitchen cabinet is characterized by bright color and easy shape, strong visual impact, very beautiful and fashionable, excellent waterproof performance, strong anti-pollution ability and easy to clean.
- ✓ Good quality white kitchen cabinet match the wood veneer glossy painting door which is not only practical but also beautiful.

Lacquer

- ✓ luxury kitchen cabinet with cabinet LED lights strip, shelf lights, kickboard lights, make the kitchen room more warm and dazzling.
- ✓ The wall between the wall cabinet and the base cabinet, designed with some stainless steel pendants, integrated with condiments, knives, pots, kitchen utensils and other types of solutions.
- ✓ Design in the kitchen cabinet layout with island in the middle to do a lot of storage, and designed the same level as the dining table and the entire kitchen into one, that can eat breakfast, but also for Western food, barbecue preparation table and countertop dual-use. What is a happy thing for parents and children to have a delicious meal together.

Lacquer

- ✓ I shape unassembled laminate high glossy kitchen cabinet design for those people who has a space limited in kitchen room. 3 meters kitchen be equipped with completed functional area, food prepare, cooking, M/W, Oven, rangehood.
- ✓ Laminate are brighter in color, various forms of edge sealing, abrasion resistance, high temperature resistance, smash resistance, penetration resistance, easy cleaning, moisture resistance, no fading, and good touch.
- ✓ Compared with melamine, Laminate is better quality and wear-resisting. High glossy or matt finished are available.

Lacquer

- ✓ L shape kitchen design by wood veneer base unit and lacquer white wall cabinet and pantries. Pantry with pull out basket, drawer with cutlery and dishes basket, trash-bin ect.
- ✓ Wood veneer door, the door is MDF with solid wood paper. In the production, the solid wood surface is generally made of concave and convex shape, and the exterior paint is sprayed, thereby maintaining the color of the log and the shape is beautiful. This can ensure the special visual effect of the solid wood, and the combination of the frame and the core board can ensure the strength of the door panel.
- ✓ A single kitchen cabinet combined with two color material panels, with a strong sense of matching, beauty and special.

Lacquer+Veneer

- ✓ kitchen cabinet organizers with open shelf pantry design, easy for storage, beautiful, can get the staffs easily.
- ✓ The wall between the wall cabinet and the base cabinet, designed with some stainless steel pendants, integrated with condiments, knives, pots, kitchen utensils and other types of solutions.
- ✓ The use of islands, integrated dining, leisure and office together.
- ✓ Countertop angular treatment, R3 rounded polished, not only beautiful, but also protect the children from striking when having fun.

Melamine

- ✓ This is a I shape 3 meters affordable kitchen cabinet. Base unit with yellow melamine ,wall unit in white melamine door. Very simple design but good practicability.
- ✓ Countertop angular treatment, R3 rounded polished, not only beautiful, but also protect the children from striking when having fun.
- ✓ Melamine door panel, the surface is flat, because the double-sided expansion coefficient of the plate is not easy to be deformed, the color is bright, the surface is more wear-resistant, corrosion-resistant, and the price is economical.

Melamine

- ✓ Melamine door panel, Ready Made Kitchen Cabinets, the surface is flat, because the double-sided expansion coefficient of the plate is not easy to be deformed, the color is bright, the surface is more wear-resistant, corrosion-resistant, and the price is economical.
- ✓ According to customer needs, design a smart and diverse kitchen storage solution to make the kitchen more powerful.
- ✓ Simple L shape design .The use of islands, integrated dining, leisure and office together.

Melamine

- ✓ According to customer needs, design a smart and diverse kitchen storage solution to make the kitchen more powerful.
- ✓ Melamine kitchen cabinet with wooden surface ,integrated with white base unit.Colors complement each other.With pre finished cabinet LED lights strip, shelf lights, kickboard lights, make the kitchen room more warm and dazzling.
- ✓ Countertop angular treatment, R3 rounded polished, not only beautiful, but also protect the children from striking when having fun.

Melamine

- ✓ Quartz is environmental protection, the hardness is very high, it is not easy to seep the oil on the countertop, it can withstand the high temperature, the hygiene is good, and it is not afraid of grinding. It is the preferred material for the countertop.
- ✓ PVC /Themofailed door, plate plastic plate substrate for the MDF, the surface is vacuum-blended or a seamless PVC film compression molding process.
- ✓ PVC /Themofailed door panels are rich in color, realistic wood grain, pure color monochrome, no cracking, no deformation, scratch resistance, heat resistance, stain resistance, fade resistance, is the most mature cabinet material, and simple maintenance.

PVC finished

- ✓ The Kitchenette Cabinet Doors is fashion and comfort, and it is placed in the kitchen, which is not only practical but also beautiful. Often such products will be loved by everyone.
- ✓ The production of such cabinets takes a long time, and the production process level is high and complex, which requires high technical input from the manufacturers. Price is competitive in our company.
- ✓ Good quality PVC shaker kitchen cabinet door is not easy to be deformed, and has good environmental protection performance, fine appearance, abrasion resistance, scratch resistance, high temperature resistance and flame retardant performance.

PVC finished

- ✓ The European-style decoration style has a unique design concept, and its furniture and lighting are slightly European-style and have a certain cultural atmosphere. The modern European decoration not only reflects the luxurious atmosphere, but also more comfortable and romantic.
- ✓ The European-style decoration style has a wide range of corners, with a perfect curve and exquisite detailing to give a comfortable touch.
- ✓ In the cabinet details, the glass door, open cabinet and wine rack are designed in a modern and young style.

PVC finished

- ✓ Shaker style is most popular all over the world. Shaker door kitchen cabinet usually made by painting or PVC or Melamine. It is popular and modern design, suitable for European style house.
- ✓ Good quality PVC kitchen cabinet door substrate is not easy to be deformed, and has good environmental protection performance, fine appearance, abrasion resistance, scratch resistance, high temperature resistance and flame retardant performance.
- ✓ The glass has good light transmission, is environmentally friendly, and does not emit odor. Rich in color, can be made into a variety of special colors, moisture, fire resistance, won't out of shape.

VANITY

Melamine • Lacquer • PVC finish...

☞ The washroom cupboard above counter basin can be installed above the countertop, and the basin can be purchased and replaced at will.

☞ In comparison, the style of the above counter basin is the most, especially in the rural style or the Chinese style, antique style and other toilets can choose different styles of products, very flexible.

☞ Design is to make life better. The ultimate goal of design is to let people experience the freedom and psychological satisfaction of life in the actual use process. From a pen to a car, from a bathroom cabinet to a home, everything we can touch in life is influenced by the design.

Melamine

☞ Cost-competitive, compared to solid wood bathroom vanity, the price is relatively cheap, and the cabinet is very delicate and beautiful.

☞ Bathroom Vanity With Sink And Top biggest advantage is practicality. The concept of the cabinet is above the bathtub. This does not affect people's need for the bathtub. It also adds some cabinets, can put some toiletries, or put some clothes that need to be changed. This is all right, it is a good helper for the bathroom.

☞ Design is to make life better. The ultimate goal of design is to let people experience the freedom and psychological satisfaction of life in the actual use process. From a pen to a car, from a bathroom cabinet to a home, everything we can touch in life is influenced by the design.

Lacquer

☞ In 2019, the new product was launched, and new products, new designs and new crafts such as full-featured makeup mirrors and new hardware accessories from Blum were launched.

☞ Small ENSUIT with vanity is very strong structure, and the water retaining edge on the side can be very good. To prevent the water from splashing and dampening the cabinet, it is convenient to take care of it. Basically, use a spare rag to clean the sewage on the countertop.

☞ Cost competitive, compared to solid wood bathroom vanity, the price is relatively cheap, and the cabinet is very delicate and beautiful
