Clear Epoxy Concrete Countertops Coating

Offers a simple, step-by-step system for countertop resurfacing, is useful for creating a beautiful, elegant countertop, bartop or table top with epoxy resin and you will have a beautiful smooth surface that is super thick, scratch-resistant, heat-resistant, UV-resistant, impact-resistant, non-yellowing, food safe, and will last a lifetime.

Choose from our countertop epoxy kits to make a one of a kind countertop that you can show off to your friends and family. Our epoxy countertop coating make it easy for anyone to creat on new or existing countertops such as laminate, tile, granite, wood and much more to create a beautiful lifetime surface.

Application is completely odorless, so there is no need to wear a respirator. For natural stone patterns, choose from our Prime Coat Base Colors and Metallic Mica Powders and Glitters to create veins, marbling and other natural stone patterns. These application instructions are intended to provide guidelines for installation of the Three-Step Countertop Metallic Epoxy Kit. There are no set rules for applying these pigments, as they are for merely a creative component to the overall system.

The basic steps a successful countertop installation with Three-Step Countertop Metallic Epoxy Kit are as follows:

- MTB-3327 Clear Concrete Sealer Prime/Base Coat** ,0.15kgs/m²
- MTB-3328 Clear Epoxy Middle Coat(mix with metallic colors)** ,0.75kgs/m²
- MTB-3329 Clear Protective EpoxyTopcoat** ,0.15kgs/m²

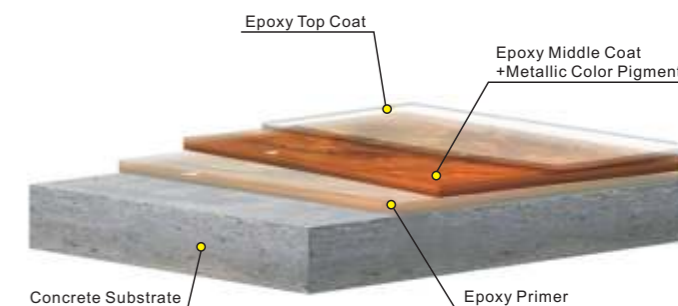

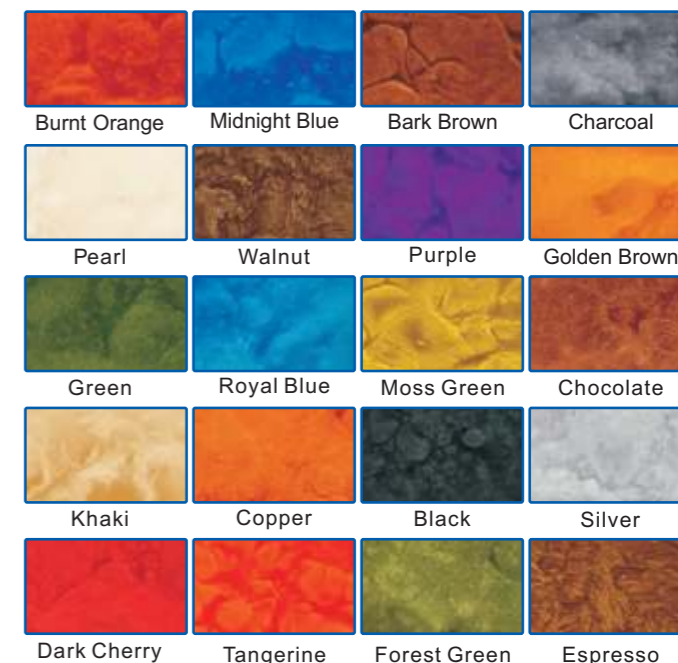

Benefits

- 100% Solid epoxy and Zero VOC (Volatile Organic Content), which means no solvents or harmful odors to breathe.
- No need to wear a respirator or worry about ventilation before, during or after application.
- Seamless, rock hard and non-porous, which eliminates staining and there is no need to reseal like natural stone.
- No unsanitary joints or grout lines that attract bacteria, yeast, fungi or other microorganisms
- Highest UV-resistance in the industry, safe for Indoor
- Non-yellowing and non-fading when applied according to instructions, creating a lifetime finish.
- Heat resistant, can bear as hot as boiling water!
- Rock hard, durable, scratch & impact resistant to 15,000 psi, five times stronger than concrete
- Thickness of 100 mils or more, creating an extreme 3D effect.
- Quick application, ready to use in as little as 36 hours and 100% odor-free.
- Customizable --Endless design and color choices for the same price. Match your home's interior with many different color combinations. Create any natural or unnatural stone pattern.
- FDA Food Safe--Rock hard, seamless and non-porous surfaces will not attract bacteria, yeast, fungi or other microorganisms, and are more resistant to staining, easier to clean and great to cook and eat on.
