Solid Color Epoxy Floor Coating System

Solid Color Epoxy Floor Coating System is a high build, self leveling, clear or pigmented resinous flooring system engineered for industrial applications. This system withstands high impact environments, providing chemical and abrasion resistance. It also has the option to be applied as a high build product to cover small imperfections. The product is pre-tinted to ensure a consistent color match every time.

The solid color epoxy system offers a wide spectrum of textures and colors, with full custom color matching available. This system is the perfect choice for large projects, and with long open times you can apply a lot of square footage at once.

TYPICAL AREAS OF USE

MTBJZJ® Solid Color Epoxy Floor Coating Systems is intended for floors subject 0.03% to medium to high foot traffic, fork lift and rubber wheel carts.

Typical uses include:

- Warehouses
- Manufacturing areas
- Laboratories & clean rooms
- Automobile service areas & garages
- Exhibition halls
- Medical & educational facilities
- Aircraft hangars
- Airplane Hangars
- Hospitals
- Warehouses
- Distribution Centers
- Laboratories
- Manufacturing Facilities
- Parking Decks
- Garages

Features & Benefits

- Ease of maintenance
- Protects the substrate
- Increases the strength of the substrate
- Hard and abrasion resistant
- VOC free & Non-toxic
- Stain and chemical resistant
- Anti-Slip
- Fast set available for quicker turn around time
- High gloss finish
- Completely UV stable
- 15 standard colors
- Varied traction coefficients available.
- All-climate application down to -30° F
- Excellent color/gloss retention
- Low-emitting, green friendly options

Coverage Data

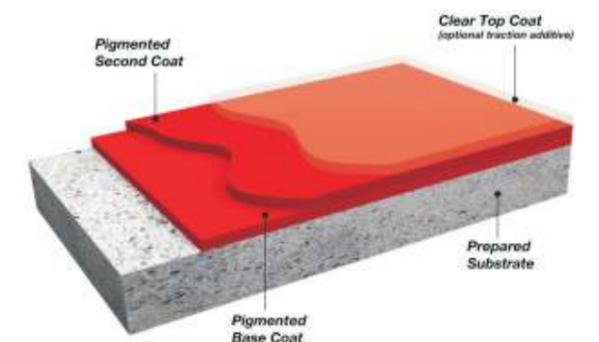

MTB-3327 Epoxy Primer, @1mm, 0.15kgs/m²
 MTB-3328 Epoxy Middle Coat, @2mm, 0.75kgs/m²
 MTB-3329 Epoxy Top Coat, @1mm, 0.15kgs/m² Solid Color Pigments, 0.015kgs/m²
