Zhejiang Haichuang Medical Device

Zhejiang Haichuang Medical Device Co., Ltd.

Zhejiang Haichuang Medical Device Co., Ltd. is founded in 2015 and located in Hangzhou, the capital city of Zhejiang province, also known as the host city of the G20 2017. We are specialized in medical disposable device manufacturing which combines R&D, Production and Sales. As for now, we have several series of products including **Bi-fix™ Surgical Incision Closure Set**, **Loopix™ Drainage Tube Securement Device**, **Wound Debridement Irrigator**, **Incision Protector** and **Tension Reduce Tape**. For the past five years, HC medical has already become one of the very few leading enterprises in the field of non-invasive surgical closure device in China, and now we are ready to serve your countries.

Cleanix™ Wound Debridement Irrigator	8

Surgical Incision Closure Set

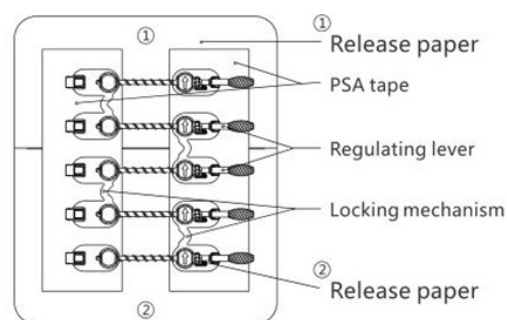

◇ Introduction ◇

A new surgical suture method. This method is suitable for the closure of the epidermis of surgical wounds without causing secondary damage to the skin. The skin's cutting edges are aligned by the proper external force of the product and remain until the wound heals naturally. The unique fastening structure design makes the operation simpler. The precise closing force adjustment improves the aesthetics of the wound after healing, and it can be peeled off easily by hand.

General surgery

Hip surgery

Humerus surgery

Thyroid surgery

▲ 4 cm

Model: 5HWH-4A

Intended use: Disposable non-invasive incision closing device for the epidermis

Materials: PSA, PA, PET, Hydrocolloid

Product components: PSA tape, regulating lever, locking mechanism, and release paper

Valid date: 30 months

Storage: product shall be stored indoors at 5~30 °C out of direct sunlight, and shall be free from corrosive gas and well ventilated.

Applicable wound length: 4cm

Sterilization method: Irradiation sterilization

Dimensions:

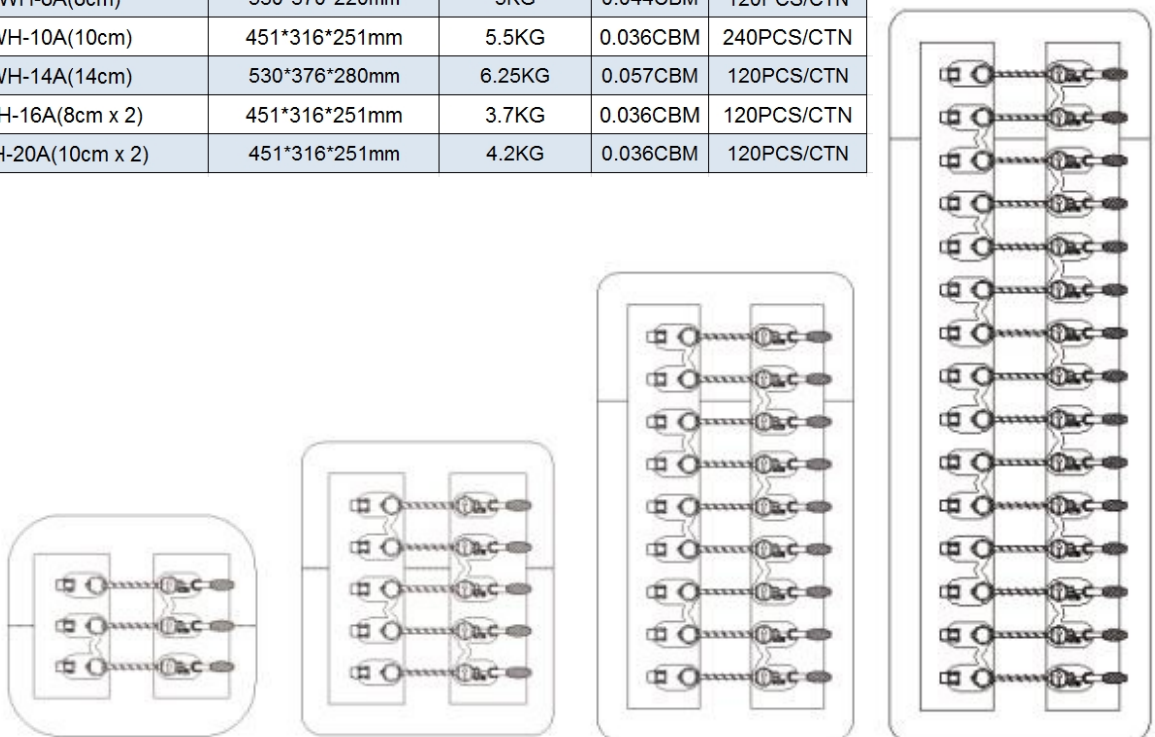

length of tape	width of tape	thickness	distance between tapes	length of lever
55mm	17mm	5mm	11mm	36mm

Packing details: 10sets per box, 20 boxes per carton

Total: 200 sets per carton

▲ Bifix-Wound Closure KIT

A superior way to close wound without stitches: effective and easy to use

Available without a prescription

Do it yourself for closing wounds whenever you are

Be prepared when accidents happened. Still willing to head for ER for stitches - a painful, invasive procedure? Our kit is perfect for you to face the trouble and saves your time and cost to the ER. It allows you to accomplish small wound closures at anywhere less than 3 minutes when emergency appears. It will not cause pain or secondary damage to the skin. And The accurate lever-adjusting system will constantly provide a proper force to reduce the tension of incision for longest 14 days due to its specially-designed adhesive in order to help ensure the wound heals properly and also leave better scar-looking.

- easy to use, time/cost saving
- no pain, no secondary damage
- no allergy, long lasting
- better scar-looking after healing
- proven in many clinical applications
- comfortable - conforms to body
- MEDICAL GRADE + CE

Wound Drainage Tube Securement Device

◇ Introduction ◇

Drainage Tube Securement Device is suitable for the fixation of all indwelling drainage tubes without any secondary damage to the skin, completely improved the traditional 'suture fixation' method and reducing the risk of drainage tube displacement and accidental extubation.

▲ GD8090-A

Product name: Drainage Tube Securement Device

Brand/Trade mark: LOOPIX

Model: GD8090-A

Materials: PSA, PET, Hydrocollod

Product components: The device is composed of adhesive tape, absorbent pad, rotating ring Outer hoop, Outer hoop fastener, fastener pulling ring, inner hoop band and inner hoop unlocking button.

Valid date: 30 months

Storage: -10°C-30°C, Keep dry.

Intended use: Intended to fix the drainage tube which can replace fixing with suture needles. And it can help minimize catheter movement and accidental removal to avoid secondary skin damage.

Applicable tube size: 6fr-36fr

Dimensions:

Area of Adhesive tape	Inner diameter of rotating ring	Outer diameter	Thickness of Rotating ring
90mm X 80mm	30mm	50mm	8mm

Packing details: 10sets per box, 20 boxes per carton

Total: 200 sets per carton

Wound Debridement Irrigator

◇ Introduction ◇

The single-use debridement irrigator is a jet cleaning system consisting of a droplet nozzle, splash cap, catheter, external medical oxygen and physiological saline. In wards, outpatient clinics or operating rooms, oxygen can be used as power to convert saline into microdrops and deliver them to the wound. The aerobic debridement of various types of wounds under the impact of microdrops is convenient, safe and effective.

◇ Features ◇

Aerobic micro-spray flushing

Precise and painless debridement and cleansing

Effective removal of bacterial biofilm

◇ Product characteristics ◇

- (1) The diameter of the microdrops is 5-100 microns, and the maximum speed can reach up to 200 m/s;
- (2) According to different wound situations, the pressure can be adjusted (oxygen flow: 4-15L/min), without damaging the healthy tissues;
- (3) 5ml of normal saline consumed per minute;
- (4) Micro-spraying aerobic debridement can effectively relieve the pain of patients;
- (5) Small and exquisite, no need for power supply, can be used beside the bed.

◇ Applicable Department ◇

Burns Department

Wound Repair Department

Orthopedics

Geriatrics

Refractory Wound Center

Wound Care Center

◇Application Illustration◇

◇Clinical effect◇

- √ Thoroughly remove bacterial, necrotic, cellular load, wound debris, and exudate;
- √ Effectively remove senescent cells at the wound edge, which is conducive to neonatal epithelial crawling;
- √ Meet the requirements and conditions of wet healing and promote the formation of epithelial cells;
- √ Reduce the pain of debridement with remarkable clinical effect.

◇Comparison of debridement methods◇

Debridement Method	Debridement Effect	Convenience	Pain
Micro spray aerobic debridement	++++	+++++	-
Surgical debridement	+++++	+++	+++++
Ultrasound debridement	++++	++	+++
Autolytic debridement	+	++++	-
Biological debridement	++	++	+
