Hessian woodworking machinery

Specialize in providing machinery for panel
laminating and profile wrapping

COMPANY PROFILE

Guangzhou Hessian Woodworking Machinery Co., Ltd which was established in 2009 is located in Shawan Town, Panyu District, Guangzhou City, Guangdong Province, China. With more than 8,000 square meters of workshop, as well as an independent office building and dormitory building. The company has been committed to the research and development, production of sheet flat laminating equipment and profile wrapping equipment, the company's PUR flat laminating production line produced by the good quality, mature technology, finished product effect, stability, in addition to the commitment to quality, we are also known for first-class service, won the majority of customers at home and abroad praise and word of mouth, "Hessian Machinery " is recognized as a leading brand in the industry!

At present the company's main products are:

First, PUR large board flat laminating production line: suitable for laminating PET, PVC, PP, PU, aluminum film, CPL and other rolled materials, as well as acrylic, HPL fireproof board, aluminum, rock board and other sheet materials.

Second, large panel wrapping/profile wrapping machine: suitable for all kinds of manufactured panels, indoor and outdoor profile surface wrapping and special material profile wrapping processing.

Cold glue paper coating production line: It is suitable for water glue coating of decorative paper and PVC, and the products can have the functions of oil heat conduction, hydraulic pressure, pressure return, embossing, automatic loading and unloading etc.

Other production lines: Acrylic-PVC and PET-PVC laminating line, honeycomb door laminating line, flooring laminating line, front splicer/side splicer.

Other ancillary equipment: automatic board loading and unloading machine, flap machine, sanding machine, vacuum machine, dust removal machine, plate grinding machine, laying pearl cotton machine, slitting machine, hot melt adhesive machine etc.

PUR平贴生产线系列 PUR Panel Laminating Production Line

Introduction:

This machine line is for PUR hot melt glue which is for the lamination of various kinds of material, it's especially good for the lamination of high gloss materials. PUR hot melt glue is a kind of the adhesive which reacts with the moisture in the air, no smell, no harming.

Materials:

Panel: Partical board, MDF, Plywood, Plastic board, gypsum board foamed plastic board etc.

Cover Material: PET, PVC, PP, PU, aluminum film and other coiled materials.

Glue: PUR hot melt adhesive

PUR卷材平贴生产线

PUR film laminating production line

HY-PUR-1400A

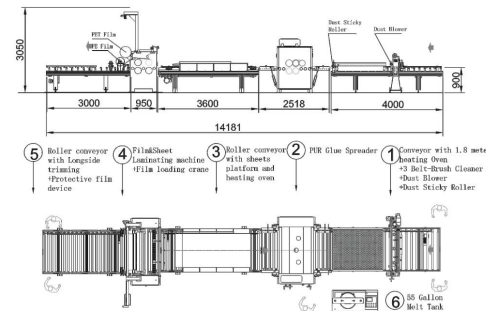

Total power	85kw
Installation area	20x6m
Production cycle	15 working days
Coating cost	1.5-4.5USD/m ²
Staffing	4-5 people
Line speed	5-17m/min
Capacity	800-1200pcs/day

PUR卷材/片材平贴生产线

PUR film / sheet laminating production line

HY-PUR-1400B

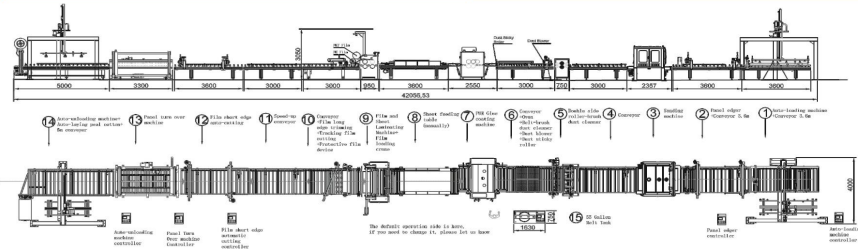

Total power	97kw
Installation area	20x6m
Production cycle	15 working days
Coating cost	1.5-4.5USD/m ²
Staffing	5-6 people
Line speed	5-17m/min
Capacity	800-1200pcs/day

PUR全自动卷材/片材平贴生产线

PUR Automatic film/sheet laminating production line

HY-PUR-1400D

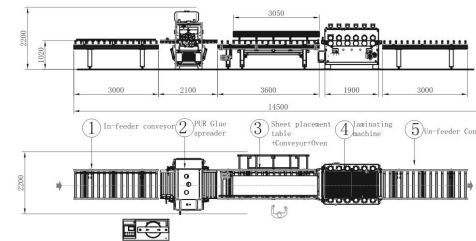

Total power	158kw
Installation area	47x6x5.5m
Production cycle	30 working days
Coating cost	1.5-4.5USD/m ²
Staffing	2-3 people
Line speed	10m/min
Capacity	800-1200pcs/day

PUR地板覆合生产线

PUR flooring lamination line

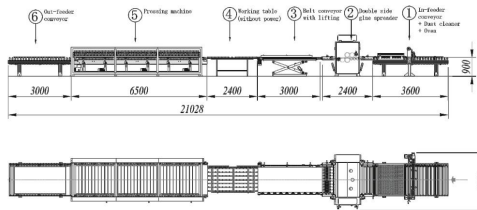

HY-PUR-500

Total power	7kw
Installation area	20x6m
Production cycle	45 working days
Staffing	6 people
Line speed	5-17m/min
Capacity	800-1200pcs/day

PUR蜂窝板、门板压合生产线
PUR Honey-comb lamination line

HY-H-1400

Total power	55kw
Installation area	28x6m
Production cycle	45 working days
Staffing	6 people
Line speed	10m/min
Capacity	800-1200pcs/day

冷胶平贴生产线系列

Cold Glue Panel Laminating Production Line

Introduction:

These production lines are specialize in sticking the decorating paper or PVC on the MDF, chipboards and plywood for producing panel of furniture which high efficient capability and pressure create a smoothly excellent surface of the finished product. It's your idea equipment of plywood & furniture company.

Materials:

Panel: Plywood, particleboard, hardboard, MDF, Gypsum board

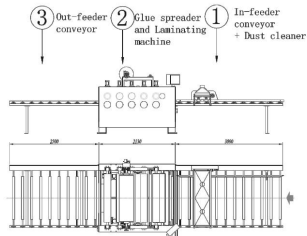

Cover Material: Decorating paper, PVC foils, PU paper

Glue: PVAC glue, latex glue, UF glue

水胶板材贴面生产线 (气压)

Cold glue lamination line (Pneumatic pressing)

HY-T-338B

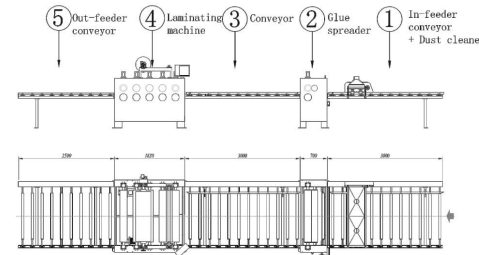

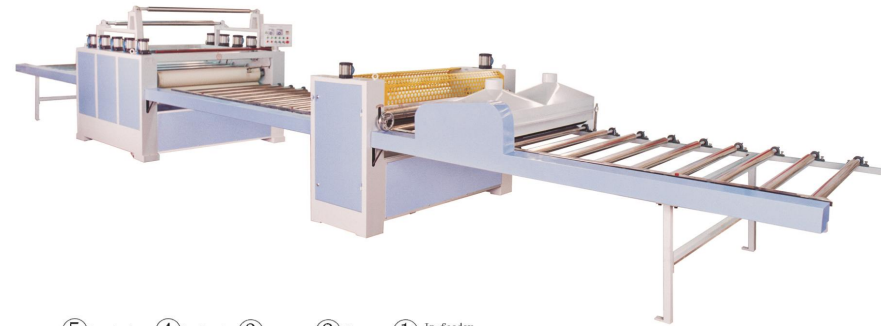

Total power	9.5kw
Installation area	10x6m
Production cycle	30 working days
Staffing	4-5 people
Line speed	11m/min
Capacity	2000pcs/day

水胶板材贴面生产线 (气压)

Cold glue lamination line (Pneumatic pressing)

HY-T-668B

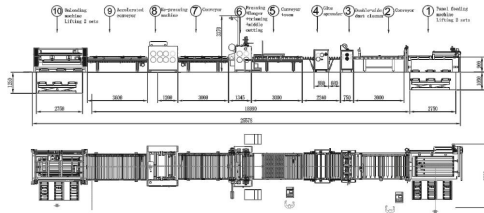

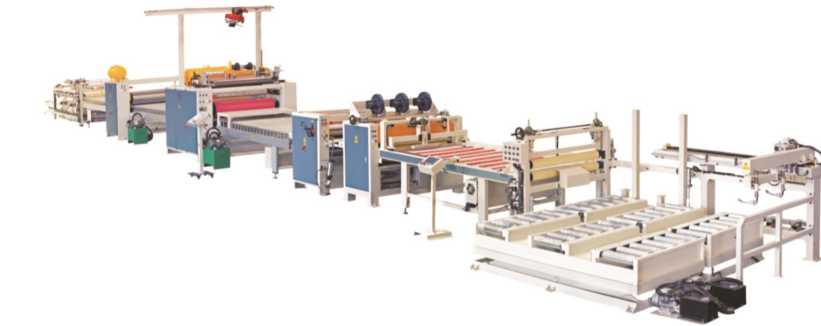

Total power	15kw
Installation area	17.5x6m
Production cycle	30 working days
Staffing	4-5 people
Line speed	5-25m/min
Capacity	2000-4000pcs/day

全自动板材贴面生产线 (液压)

Automatic cold glue lamination line (Hydraulic pressing)

HY-T-1400

Total power	80kw
Installation area	34x6m
Production cycle	45 working day
Staffing	2-3 people
Line speed	5-25m/min
Capacity	2000-4000pcs/day

亚克力片材贴合生产线

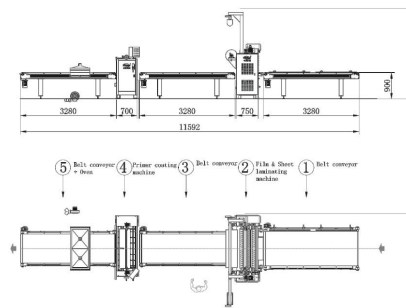

Acrylic sheet making machine

HY-T-1350

Introduction:

This machine is specialized for lamianting the transparent arylic sheet with the thin PVC, it can make many diffence patten,colour arylic sheet.

Total power	17kw
Installation area	20x6m
Production cycle	30 working days
Staffing	6 people
Line speed	5-25m/min
Capacity	2000-3000pcs/day

包覆系列 Wrapping machine series

Introduction:

Using with PUR hot melt glue, EVA hot melt glue or cold glue can do different kind of material, like PVC, veneer, paper, CPL ect and base profile for MDF, WPC, PVC plastic, Aluminum.

Which suitable for various feild of profile such as door, windows,picture frame,flooring ect.

Materials:

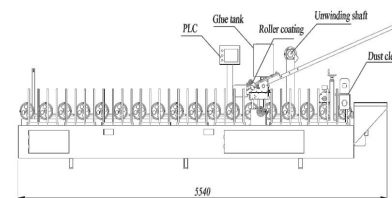

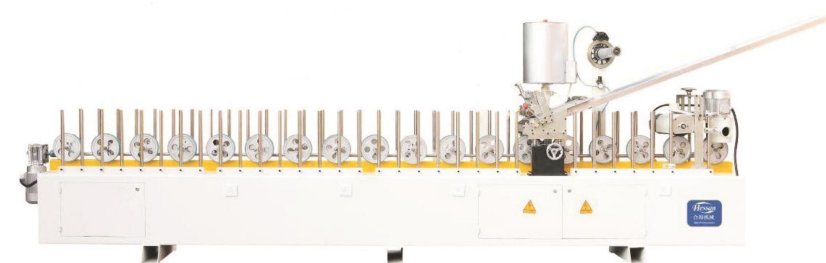

Panel: Plywood, Particle board, MDF, Solid wood, Aluminum, WPC.

Cover Material: Veneer, paper, PP, CPL, PVC etc.

Glue: EVA/PO hot melt glue, PVAC glue, PU solvent glue, PUR hot melt glue.

EVA/PO热胶线条包覆机 EVA/PO Hot glue profile wrapping machine

HY-FA-400/600

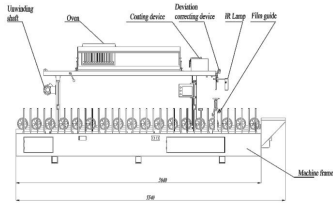

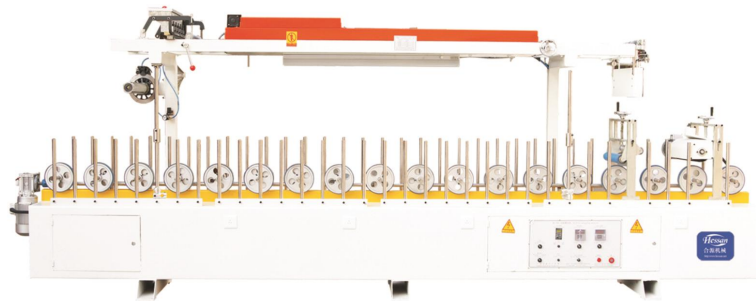

Applicable panel	Plywood, Particle board, MDF
Applicable cover material	Veneer, paper, PP, CPL
Applicable glue	EVA/PO Hot glue
Total power	5.5kw
Installation area	5x1m
Production cycle	35 working days
Staffing	2-3 people
Line speed	2-25m/min
Capacity	7200m/day

冷胶线条包覆机

Cold glue profile wrapping machine

HY-FB-400/600

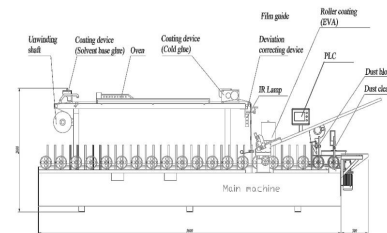

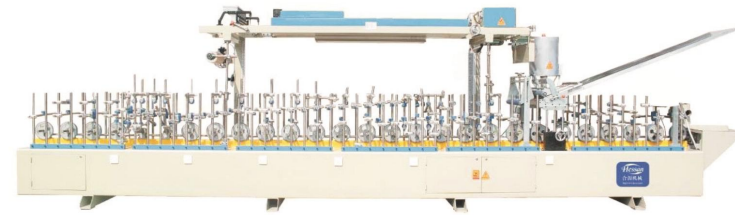

Applicable panel	Particleboard, MDF, Aluminum, WPC.
Applicable cover material	Decorating paper, PVC foils, PU paper
Applicable glue	PVAC glue, PU solvent glue.
Total power	9kw
Installation area	5.5x1m
Production cycle	35 working days
Staffing	2-3 people
Line speed	2-25m/min
Capacity	7200m/day

冷热胶线条包覆机

Cold & Hot glue profile wrapping machine

HY-FC-400/600

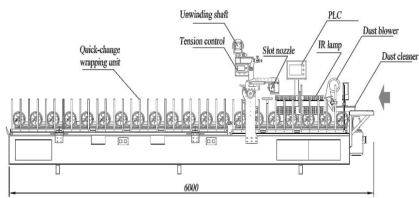

Applicable panel	Particleboard, MDF, Aluminum, WPC etc.
Applicable cover material	Decorating paper, PVC foils, PU paper, Veneer, PP, CPL
Applicable glue	PVAC glue, PU solvent glue, EVA/PO hot melt glue.
Total power	18kw
Installation area	5.5x1mm
Production cycle	45 working days
Staffing	2-3 people
Line speed	2-25m/min
Capacity	7200m/day

PUR 热熔胶线条包覆机

PUR Hot glue profile wrapping machine

HY-FE-350/450/650

Applicable panel	Particleboard, MDF, Aluminum, WPC etc.
Applicable cover material	Decorating paper, PVC foils, PU paper, Veneer, PP, CPL etc.
Applicable glue	PUR hot melt glue.
Total power	23kw
Installation area	6x2mm
Production cycle	35 working days
Staffing	2-3 people
Line speed	2-25m/min
Capacity	12000-18000m/day

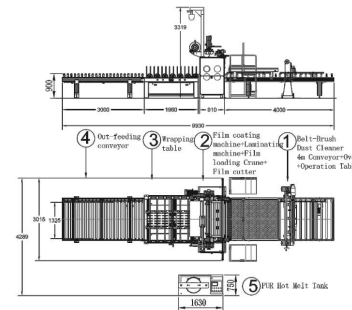

PUR板面平贴包覆生产线

PUR Hot glue panel laminating and wrapping machine

HY-FE-1300L

Introduction:

This machine is professional for wrapping battens of cupboards and wardrobes. Especially for high gloss foils, it can make the surface very shiny and smooth without orange skin. No edge bending, no bending mark, no debonding. With auto trimming and cutting devices, it will make your production easy and efficient.

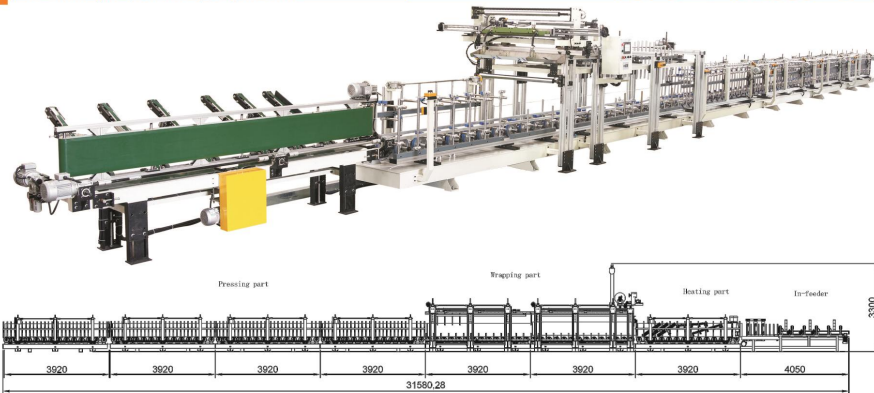

Applicable panel	Particleboard, MDF, Aluminum, WPC etc.
Applicable cover material	Decorating paper, PVC foils, PU paper, Veneer, PP, CPL etc.
Applicable glue	PUR hot melt glue.
Total power	39kw
Installation area	15.7x4m
Production cycle	30 working days
Staffing	4-5 people
Line speed	5-17m/min
Capacity	800-1200pcs/day

PUR胶360条板包覆生产线

PUR Hot glue panel wrapping machine

HY-FE-1300W

Introduction

FE-1300W that mean the maximum working width of the paper and PVC film width is 1300mm, and height of panel is maximum size from 450-600mm. The machine use PUR hot melt glue with a width flexible adjust system slot nozzle and 55 gallon hot melt tank. Panel Auto feeding system, cleming brushing system, panel preheating system also including.

Applicable panel	Plywood, Particle board, MDF etc.
Applicable cover material	Decorating paper, PVC foils, PU paper, PP etc.
Applicable glue	PUR hot melt glue.
Total power	56kw
Installation area	31x2.5m
Production cycle	45 working days
Staffing	5-6 people
Line speed	5-20m/min
Capacity	800-1200pcs/day

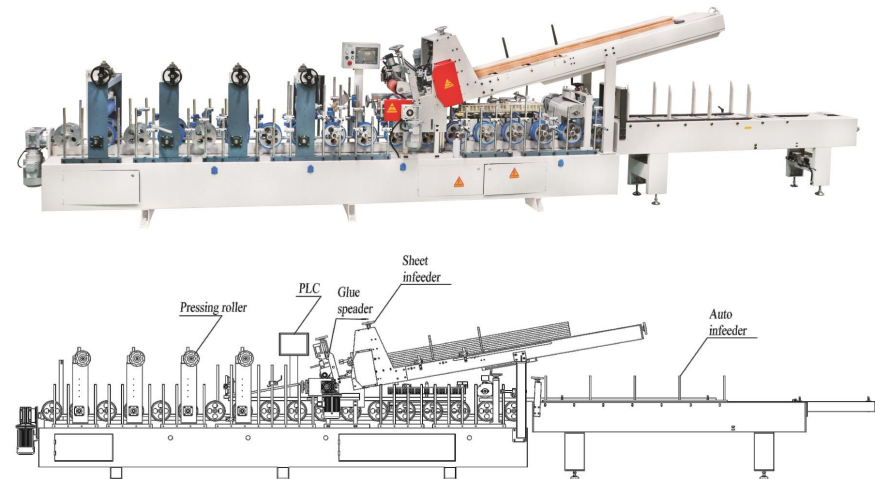

PUR/EVA/PO 热胶正拼贴合机

PUR/EVA/PO Glue profile piece-together machine

HY-J-300

Introduction

This machinery are special for gluing the hot melt glue on the strip profile and pressing the strip on the top of another profile which for create the preparatory of the profile and for the next step mould processing.

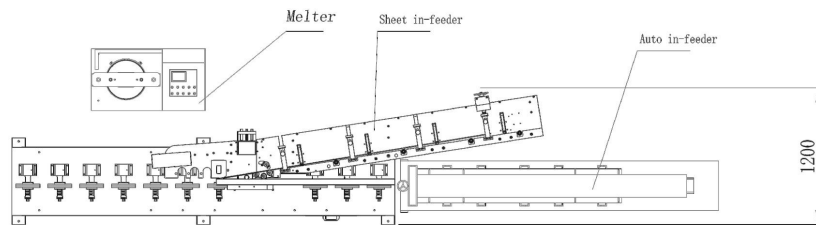

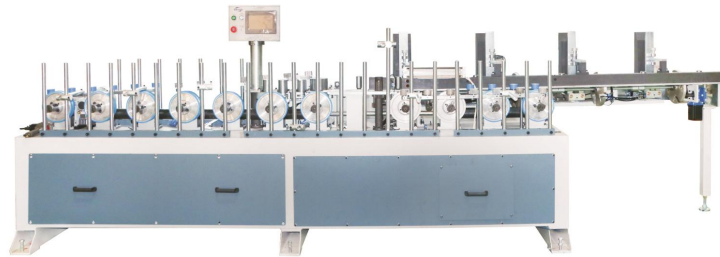

PUR/EVA/PO 热胶侧拼贴合机

PUR/EVA/PO Glue profile side splicer machine

HY-SJ-300

Introduction

This machine is special for making adjustable door frames for different wall widths. It makes "L" shape profiles by sticking 2 laths together. Combined with auto feeder, this machine is very deal for door, picture frame manufacturers.
