

# TQC-500DII Mobile Antenna

Specially designed for automobile communications, TQC-500DII mobile antenna is made of stainless steel spring strand, it has good flexibility and UV stable ability.

| Specifications                                                                                                      |                             |
|---------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Model                                                                                                               | TQC-500DII                  |
| Frequency Range-MHz                                                                                                 | 480~590                     |
| Bandwidth-MHz                                                                                                       | 20                          |
| Gain-dBi                                                                                                            | 5.5                         |
| VSWR                                                                                                                | ≤1.5                        |
| Input Impedance-Ω                                                                                                   | 50                          |
| Polarization                                                                                                        | Vertical                    |
| Maximum Power-W                                                                                                     | 100                         |
| Connector                                                                                                           | SL16 male                   |
| Length-cm                                                                                                           | 69(may vary with frequency) |
| Weight-g                                                                                                            | 260                         |
| Note: at the bottom of the spring crash-proof; With M110 main magnet, cable joint derivation specified by the user. |                             |
