

Heyuan Secnic Spot Outdoor Interactive Voice Sound Controlled Shout Yelling Singing Fountain

Project Description:

Shout fountain is also called voice-control fountain, is a fountain of recent popularity. It is installed with voice control system, when people input sound through a microphone, the sound is converted to signals and passed to the control system, finally to control the water spray height by control system.

when you close to the shouting fountain and shout to the shout fountain, you shall find that the water column from the shout fountain rise up into the air. Bigger your voice is , higher the water column is . The shout fountain has a strong entertainment.

Sound-control Fountain is also called as Shouting Fountain, is a newly popular fountain type in these years. It is with the features of interactivity, easy installation, low cost, is a good choice for scenic spot waters-cape project.
