# CORPORATE PHILOSOPHY

## 企业理念

### ปรัชญาองค์กร

Marble is fascinating the human kind since the rise of every civilization. Marble's beauty is universal and we can't renounce to it, but at the same time it is extremely fragile. So many wonderful marbles don't exist anymore. Our mission is to create an alternative option, which doesn't require the destruction of that beauty we admire so much, without renouncing to it. We dream about a future where natural marbles will no longer be used in extensive applications, and at the same time more people will be allowed to responsibly enjoy the beauty of marble.

自人类文明兴起以来，大理石深受人们喜爱。石材之美广受喜爱，导致人们无法舍弃大理石。但天然大理石本身又极难保养。因为人类的过度开采，很多漂亮的大理石都不复存在。简一的使命是创造另一种选择，无需破坏我们最喜爱的漂亮石材。我们有一个梦想，梦想未来人们不再大面积铺设天然石材，但依然能感受天然石材的美。

หินอ่อนเป็นที่รักของผู้คนตั้งแต่อารยธรรมมนุษย์รุ่งเรืองขึ้น ความงามของหินเป็นที่ชื่นชอบจนผู้คนไม่สามารถละทิ้งหินอ่อนได้ แต่หินอ่อนธรรมชาตินั้นดูแลรักษาได้ยากมาก เนื่องจากการแสวงหาประโยชน์มากเกินไปของมนุษย์ หินอ่อนที่สวยงามมากมายจึงไม่มีอยู่อีกแล้ว ภารกิจของ GANI คือการสร้างทางเลือกใหม่ โดยไม่ทำลายหินสวยงามที่เราชื่นชอบนั้นๆ GANI มีความฝันว่าในอนาคตผู้คนจะไม่ใช้หินธรรมชาติในปริมาณมากอีกต่อไป แต่พวกเขาจะยังสามารถสัมผัสได้ถึงความงามของหินธรรมชาติ

So, GANI comes from its founder passion for marble and marbles' pure and elegant beauty. The desire for knowledge about marble leads to discovery of an unbelievably varied nature in every corner of our world. Challenging this kind of search, turned GANI into a marble collector, and collecting the priceless and fragile beauty of marble all around the world.

因此，简一致力于还原大理石纯粹优雅的美感。对大理石知识的渴望指引着我们去世界各地挖掘各种天然石材。在找寻大理石的过程中，简一成了大理石收藏家，收集全球各地美丽无价又易碎的大理石。

ดังนั้น GANI จึงมุ่งมั่นที่จะฟื้นฟูความงามอันบริสุทธิ์และสง่างามของหินอ่อน ความกระหายในความรู้เรื่องหินอ่อนทำให้ GANI ต้องขุดหินธรรมชาติทุกชนิดทั่วโลก ในกระบวนการค้นหาหินอ่อน GANI กลายเป็นนักสะสมหินอ่อน รวบรวมหินอ่อนที่สวยงามล้ำค่าและเปราะบางจากทุกมุมโลก

“Natural marbles are beautiful because they are created by God. They are precious because God just creates them for only one time. Therefore, GANI's mission is to continue God's creation by developing the best marble tiles with natural marble elegance in the world.” GANI's Chairman—Li Zhilin

“上帝之手创造了大理石，但大理石是稀缺的，我要用我的手创造一个大理石瓷砖，来弥补大自然和地球，这就是我的使命，我要为社会承担这个责任。” 简一集团董事长——李志林

“พระเจ้าได้สร้างพระเจ้าสร้างหินอ่อนขึ้นมา แต่หินอ่อนนั้นช่างเปราะ ผมต้องการใช้มือของผมสร้างกระเบื้องหินอ่อนขึ้น เพื่อทดแทนธรรมชาติและโลก นี่คือการกิจของผม ผมต้องการรับผิดชอบต่อสิ่งกมนี่” โดยประธานของ GANI — Li Zhilin

# CORPORATE DESCRIPTION

## 企业简介

### คำอธิบายองค์กร

GANI CERAMICS CO., LTD, founded in Foshan Guangdong in 2002, pioneered a new porcelain category –Marble Tiles in 2009. Since its birth, Marble Tiles have been widely recognized by various sectors and customers. The sales network of GANI MARBLE TILES covers more than seventy countries around the world like Italy, France, America, and Australia. With more than five hundreds franchised stores in China and around the world, GANI proactively delivers its quality products and services to dozens of famous projects like hotels, shopping malls, airports, deluxe apartments in Tokyo, Dubai, Paris, Singapore, Seoul, Bangkok, Sydney, Las Vegas, Hong Kong, Shanghai and Beijing. Now more than 1 million families choose GANI MARBLE TILES.

广东简一（集团）陶瓷有限公司（以下简称“简一”）创建于2002年，于2009年开创大理石瓷砖品类。大理石瓷砖的出现，让人们在高档装修时，除了选择大理石，又多了一个好的选择。目前，简一已出口意大利、法国、美国、澳大利亚等70多个国家。全球范围内，简一拥有500多家授权专卖店，致力于为全球酒店、购物商场、机场、豪华公寓等商业体提供优质产品和服务。简一服务网络覆盖东京、迪拜、巴黎、新加坡、首尔、曼谷、悉尼、拉斯维加斯、香港地区、上海、北京等城市，现有逾百万家庭选择简一。

Guangdong GANI (Group) Ceramics Co., Ltd. (ต่อไปมีเรียกว่า "GANI") ก่อตั้งขึ้นในปี 2545 และสร้างหมวดหมู่ของกระเบื้องหินอ่อนในปี 2552 การเกิดขึ้นของกระเบื้องหินอ่อนทำให้ผู้คนมีทางเลือกที่ดียิ่งขึ้นนอกเหนือจากการเลือกหินอ่อนเมื่อต้องการตกแต่งชั้นสูง ปัจจุบัน GANI ถูกส่งออกไปยังกว่า 70 ประเทศ รวมทั้งอิตาลี ฝรั่งเศส สหรัฐอเมริกา และออสเตรเลียทั่วโลก GANI มีร้านค้าตัวแทนจำหน่ายที่ได้รับอนุญาตมากกว่า 500 แห่ง และมุ่งเน้นที่จะจัดหาผลิตภัณฑ์และบริการคุณภาพสูงสำหรับงานโรงแรม ห้างสรรพสินค้า สนามบิน อพาร์ทเมนต์หรู และหน่วยงานเชิงพาณิชย์อื่น ๆ ทั่วโลก นอกจากนี้ GANI ยังได้ให้บริการครอบคลุม

GANI production and R&D base is the world's largest investment in specialized marble tile production base, of more than 700 million yuan investment and over 430 thousand sqm: it has 1000 working staffs and a monthly output of nearly 1 million sqm. GANI is a provincial cleaner production enterprise and energy-saving outstanding enterprise and has been approved by ISO9001 international quality management system, ISO14001 international environmental managementsystem, EU CE certification and China compulsory 3c certification.

简一生产研发基地是全球投资规模最大的大理石瓷砖专业化生产基地，总投资7亿多元，占地43万多平方米，拥有1000多个员工，月产量近100万平方米。简一是省级清洁能源生产企业领头羊，已通过ISO 9001国际质量管理体系、ISO 14001国际环境管理体系、欧盟CE认证和中国强制性3C认证。

ฐานการผลิตและ R&D ของ GANI เป็นฐานการลงทุนที่ใหญ่ที่สุดในโลกของการผลิตกระเบื้องหินอ่อนเฉพาะด้าน ด้วยเงินลงทุนมากกว่า 700 ล้านหยวนและกว่า 430,000 ตร.ม. พนักงานมากกว่า 1,000 คน และผลผลิตเกือบ 1 ล้านตร.ม. ต่อเดือน GANI เป็นผู้นำในองค์กรการผลิตพลังงานสะอาดระดับจังหวัด และได้ผ่านระบบการจัดการคุณภาพระดับสากล ISO 9001 ระบบการจัดการสิ่งแวดล้อมระหว่างประเทศ ISO 14001 การรับรอง CE ของสหภาพยุโรป และการรับรอง 3C ที่บังคับใช้ของจีน

As a technological innovation pioneer of marble tiles, GANI dedicated itself to developing the best marble tiles in worldwide through upgrading the product technologies year by year. Now we have the only province-level marble tile research and development center in China with a hundred professional researchers and designers, and meanwhile we possess mostly patents and proprietary technologies in this field. GANI has set up a long-term partnership with the most advanced equipment and materials suppliers, professional research agencies in Italy, Spain, Germany and China. Focusing on customers, through the research and innovation on material, technology, craft and design, GANI endeavors to meet customers' demands from usability to decorative effect, from humanities and arts to natural beauty.

作为大理石瓷砖开创者，简一多年来通过产品技术攻关，研发出全球最好的大理石瓷砖。简一现拥有国内唯一一个省级大理石瓷砖研发中心，百名专业研究人员和设计人员，同时拥有该领域多项专利和专有技术。简一和意大利、西班牙、德国、中国最先进的设备材料供应商、以及专业研究机构建立了长期合作伙伴关系。以客户为中心，简一通过对材料、工艺、工艺、设计的研究与创新，努力满足客户从实用性到装饰效果、从人文艺术到自然美感的需求。

ในฐานะผู้บุกเบิกนวัตกรรมทางเทคโนโลยีของกระเบื้องหินอ่อน GANI ได้พัฒนากระเบื้องหินอ่อนที่ดีที่สุดในโลกผ่านการวิจัยเทคโนโลยีผลิตภัณฑ์ในช่วงหลายปีที่ผ่านมา ปัจจุบันเรามีศูนย์วิจัยและพัฒนากระเบื้องหินอ่อนระดับนานาชาติที่มุ่งเน้นศึกษาในประเทศจีนที่มีนักวิจัยและนักออกแบบมืออาชีพกว่าร้อยคน และในขณะเดียวกันเราก็มีสถาธิบริษัทและเทคโนโลยีที่เป็นกรรมสิทธิ์ส่วนใหญ่ในสาขานี้ GANI ได้สร้างความร่วมมือระยะยาวกับคู่ค้าผู้ขายอุปกรณ์และวัสดุที่ทันสมัยที่สุด จาก อิตาลี สเปน เยอรมนี และจีน GANI ยึดถือลูกค้าเป็นศูนย์กลาง จึงมุ่งมั่นที่จะตอบสนองความต้องการของลูกค้าตั้งแต่การใช้งานจริงไปจนถึงผลลัพธ์ของการตกแต่ง จากอดีตพัฒนากรรมไปจนถึงความงามตามธรรมชาติ

# CORPORATE DESCRIPTION

## 企业简介

คำอธิบายองค์กร

GANI is known as the creator of Marble Tiles. Marble Tiles, capturing the natural beauty of marble with high performances of porcelain tiles, represent GANI's solution for a responsible use of marbles' application.

In this meaning we can consider Marble Tiles as a technological evolution of marbles.

As a kind of building decorating material, GANI MARBLE TILES can apply almost all floors and walls, in interior and exterior, and also can be used as functional materials in furniture and kitchen and bath's platforms.

GANI develops hundreds of Marble Tiles with various patterns, veins, sizes and texture which can be transformed into many artistic works. Based on the customers' demands, we can deliver customized design and production services.

GANI makes the marble's beauty be discovered, alive and sustainable while protecting our environment through its wisdom and innovation.

众所周知，简一是大理石瓷砖的开创者。大理石瓷砖，兼具自然石材之美和瓷砖的优越性能，代表了简一替代大理石的解决方案。从这个意义上来说，大理石瓷砖是天然大理石的技术创新。作为一种建筑装饰材料，大理石瓷砖几乎可以应用于室内外所有地面和墙面，也可用作家具和厨卫平台。

简一开发出上百种花色、纹理、质感、尺寸的大理石瓷砖，堪比艺术品。除此之外，我们基于客户需求，提供定制化设计、生产服务。

简一凭借智慧和创造力，在持续保护环境的同时，发现大理石之美，还原大理石之美。

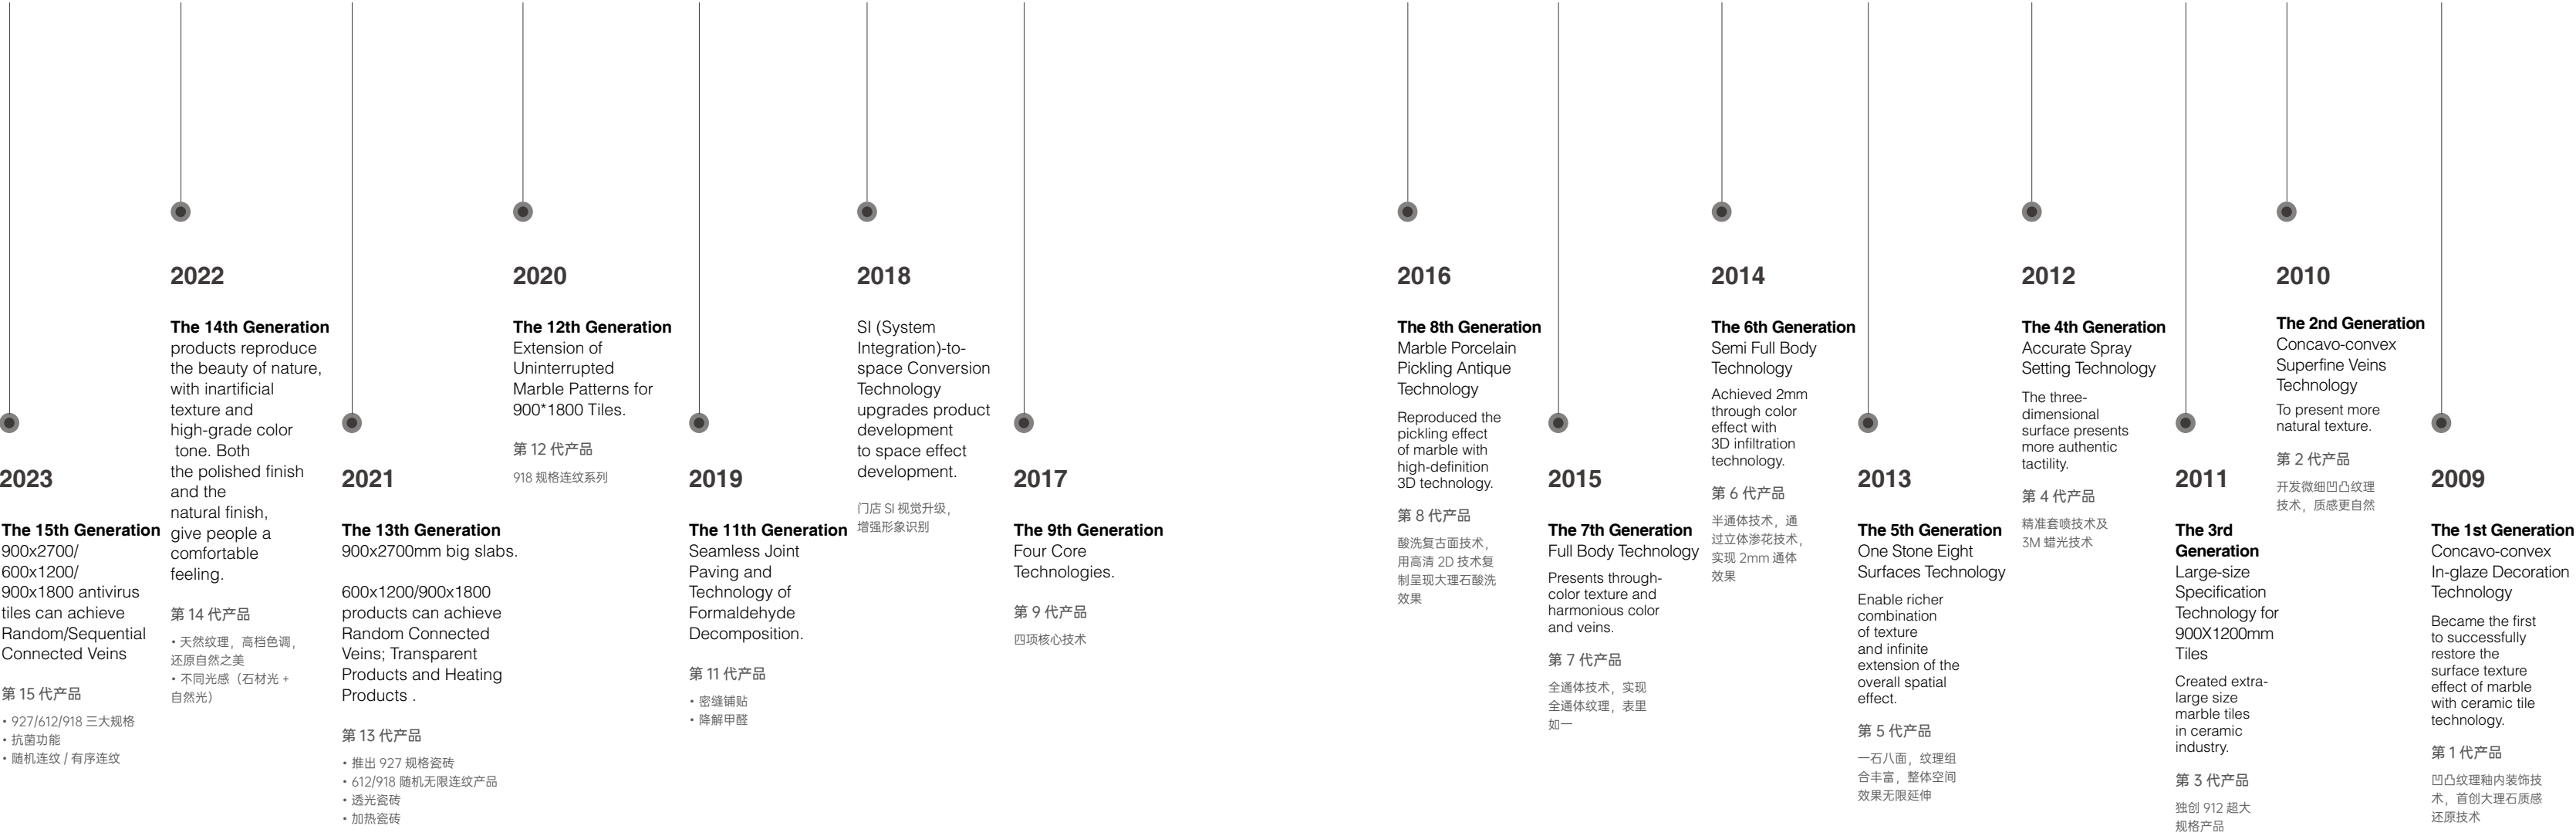

GANI ผู้บุกเบิกกระเบื้องหินอ่อน ที่ซึ่งผสมผสานความงามของหินธรรมชาติและประสิทธิภาพที่เหนือกว่ากระเบื้องทั่วไป กล่าวคือ กระเบื้องหินอ่อน GANI นั้นเป็นคำตอบของวัสดุแทนหินอ่อนธรรมชาติ ในแง่นี้ กระเบื้องหินอ่อนเป็นนวัตกรรมทางเทคนิคของ หินอ่อนธรรมชาติ กระเบื้องหินอ่อนถือเป็นวัสดุตกแต่งอาคาร ที่สามารถนำไปใช้กับพื้นและผนังภายในและภายนอกได้เกือบทั้งหมด และยังสามารถใช้เป็นเฟอร์นิเจอร์ ห้องครัว และห้องน้ำได้อีกด้วย GANI ได้พัฒนากระเบื้องหินอ่อนหลายร้อยแบบ ทั้งสี ลวดลาย ผิวสัมผัส และขนาด เล็กเช่นเดียวกับงานศิลปะ นอกจากนี้ ยังให้บริการออกแบบและผลิตตามความต้องการของลูกค้าอีกด้วย GANI อาศัยภูมิปัญญาและความคิดสร้างสรรค์ ค้นพบและฟื้นฟูความงามของหินอ่อน ในขณะที่ตัวเราก็สามารถปกป้องสิ่งแวดล้อมอย่างยั่งยืน

# THE TYPICAL TECHNOLOGIES OF GANI’S PRODUCTS FROM 1<sup>st</sup> TO 15<sup>th</sup> GENERATION

简一历代产品名录（第 1 代 - 第 15 代）

The First Piece Of Marble Tile Was Created By GANI In 2009  
2009 年首创大理石瓷砖

# ANTIVIRUS TILES

## WORKING MECHANISM

抗菌瓷砖工作原理

### RESOLUTION PRINCIPLE

抗菌原理

**ADVANTAGE:**  
Zinc compound forms a fortress with sharp knives on the surface.

优点：  
复合杀菌材料在瓷砖表面形成带尖刺的碉堡，杀菌更持久。

\*  : Zinc compound is an anti-virus material in glaze and coating layer.  
复合杀菌材料是釉料和涂层共同形成的抗菌工艺。

# ANTIVIRUS TILES

## 长效杀菌抗病毒瓷砖

The metal ions in the glaze layer are positively charged, which can destroy the cell membrane at a certain concentration, or strongly attract the enzyme protein in the bacteria. Then they will quickly destroy the organism structure and inhibit bacterial reproduction. The anti-virus tiles play an effective, stable and long-term role in broad-spectrum sterilization.

# GANI SEAMLESS JOINT PAVING

**KEY WORDS:**  
**GAP0.7MM, NATURAL STONE EFFECT, SPACE AESTHETICS, EXCLUSIVE BY GANI**

- Gap can be controlled within 0.7mm of seamless joint paving services, which can effectively implement the marble tile paving effect like natural stone, owning the sense of oneness, so that GANI obtains more advantages in showing products effect.
- From a tile to a space, GANI provides a perfect solution for space aesthetics.
- The ultimate experience of product, service and effect.

Why does GANI achieve seamless joint paving technology?

- A. GANI products are more flat, of which flatness and other dimensional deviation control within 0.5mm, 10 times stricter than the national standard, and double higher than the industry advanced enterprise standards;
- B. Lower water absorption rate of 0.02-0.03%, better than ordinary ceramic tile of 0.5% water absorption rate;
- C. Smaller thermal expansion coefficient of  $6.8 \times 10^{-6}$  to  $7.0 \times 10^{-6} \text{ }^{\circ}\text{C}^{-1}$ , lower than that of metals, steels and other materials.
- D. GANI adopts seamless joint paving construction standard, is developed with Italy construction expert, Claudio, to ensure the safety and effectiveness of construction.

What is the advantages of GANI seamless joint paving technology?

Normal tile paving needs to reserve 1.5-3mm expansion joints, GANI seamless joint paving can be made within 0.7mm, which is much closer to the decorative effect of natural stone and board.

Will there be any bulging after seamless joint paving?

The probability of bulging by traditional seamless joint paving technology is higher later, with rate of more than 20% . GANI seamless joint paving technology, with the world's leading construction standard of Claudio, Italy construction expert, is strictly in accordance with the standard from base surface to the bottom material of tile, achieving superior effect than European acceptance standards, of which less than 5% of floor bulging rate and 15% of wall bulging rate.

Will tile be bulging or deformation by heat-expansion and cold-contraction?

The impact of the tile deformation has three factors:

One is screed floor and semi-wetting mortar layer under tile; the second is the bonding layer; the third is the ceramic tile itself, while shrinkage of tile is the smallest because of high temperature forging, we do not have to worry about its deformation. Secondly, the shrinkage rate of the screed floor and semi-wetting mortar layer is low. Last but not least, the biggest contraction is the bonding layer, especially when traditional paving usually used with cement paste, like our common cement road surface which is easy to crack.

Therefore, most of the extrusion and arching are caused by cement paste, which is also the reason why Europe can not use cement for tiling.

There are two technologies for GANI to avoid problems caused by heat-expansion and cold-contraction:

- (1) The first is the bonding layer used with a proprietary binder instead of cement paste, which is the exclusive developed by GANI, Claudio and BQT company. Its shrinkage rate is 70% lower than cement paste ;
- (2) Reserve 1-2cm gap for expansion when floor paving so as to keep cooling space.

Remarks: the materials and adhesive is developed special for China market, for international use, should be applied accordingly to local practice and standard.

# GANI 15<sup>th</sup> GENERATION PRODUCTS

## FIVE CORE TECHNOLOGIES

We developed a 1230 °C high-temperature transparent glaze with appropriate crystallization and replaced pore phase with crystalline phase. Therefore, the hardness and density of glaze are improved. The product abrasion resistance is also enhanced by 20% and reached level 4, 1-2 levels higher than that of similar products manufactured by counterparts at home and abroad. The products now enjoy wider scope of application.

Concave-convex Anti-slip Micro Technology increases the dry static friction coefficient to 0.7 (static friction coefficient of swimming pool nonslip safety walk is 0.5 ), which means one will not slip on the surface when standing on GANI MARBLE TILES at an angle of 30 degrees to the horizon.

In view of different mineral compositions and texture characteristics of the products, we have set various polishing methods and process parameters accordingly in advance, achieved intelligent controlling, and improved the optical properties of our products. Specifically, the products now present brightness variations with more holistic gentle perception, which will enable more comfortable space effects.

The 3D Full Body Technology represents the upgrade of GANI first and second generations' full body. GANI independently developed the world's leading precision powder allocation and synchronous printing core technologies and achieved harmonious color and veins of marble tiles with three-dimensional extension of the product texture in directions of left and right, front and back, up and down. The products can not only better meet the conventional decorative requirements like beveling and groove broaching, but also be flexibly used for a variety of artistic modeling processing.

# GANI 5S VALUE

## SIMILARITY

Marble is natural stone, but it is running out.  
Each Gani marble tile highly restores natural effect.

## SEAMLESS JOINT PAVING

Tiles gap is bad looking and need to maintain.  
Seamless joint paving reduces the flaws.

## SENSE OF ONENESS

Layout of traditional pattern looks messy.  
Connected vein makes the space look bigger.

## SOLUTION

Different customers have different choice.  
Gani offers 9 colors, 6 sizes and 6 finishes.

## SINGLE SHADE

Color variation affects continuous supply.  
Gani guarantees one shade on one batch.

FINISHED

GANI has 6 regular finishes covering most regular items:

- Polished(BM)
- Velvet(BR)
- Honed(BS,SP)
- Natural(N,NB,SN)
- Litchi (LZ)
- Relief

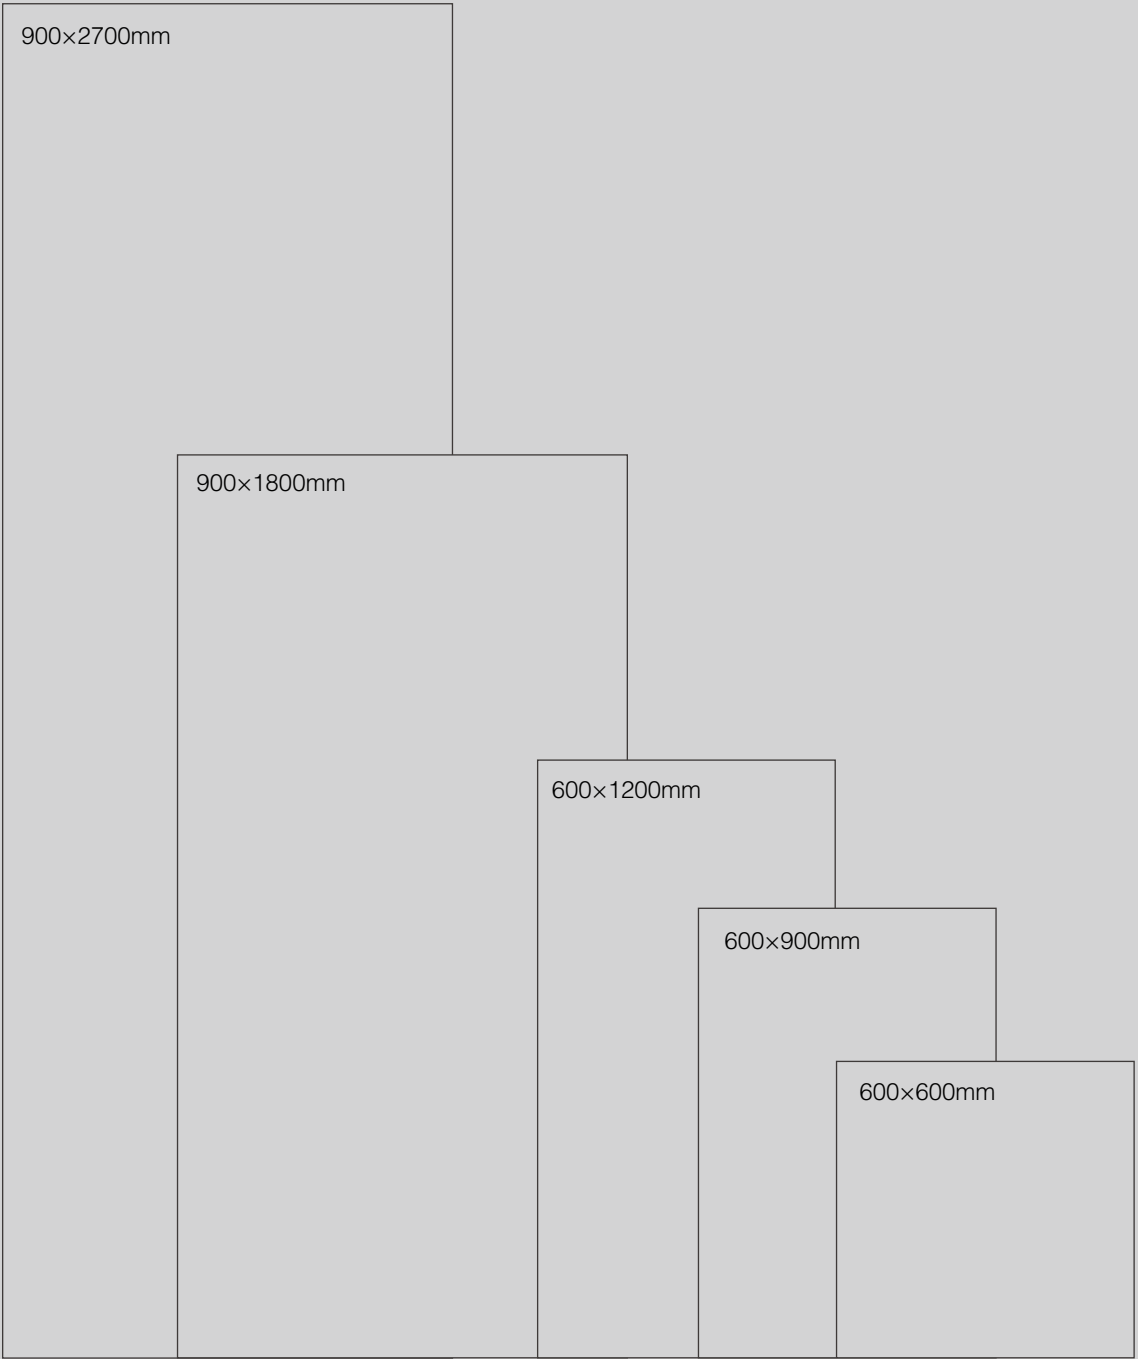

# SIZES

Starting from the 14th generation products, GANI focuses on large format products. The 14th generation products upgrade 2 large sizes: 900x1800mm, 900x2700mm. The large size not only has the advantage to cover larger areas with fewer joints, but also enables us to appreciate better the beauty of the individual patterns.

This year GANI introduced a new product category: Big Slabs Marble Tiles, which opens up to new possibilities of applications,especially about the production of furnitures and architectural elements.

## White Charm

The name of this ancient Greek marble means “best marble” and is appreciated for the light grey thick veins on the white background. The quarry of this precious stone is in Macedonia, near the Drama village, located in the north east of Greece. The white dolomitic background is scattered with linear diagonal calcite lines, adding beauty in every interior. This stone is suitable for projects of classical or modern look, adding elegance and personality in bathrooms, kitchens, livings, floors and walls. Ariston can be matched with other colored marbles to add contrast and personality in every space.

Bardiglio is a kind of Italian white marble with characteristic grey veins crossing the slab, sourced from the most exclusive quarry in Toscana, Italy. From the Etruscans to the Romans to the Renaissance, Toscana is possibly the greatest repository of art in the world, from extraordinary paintings and sculpture to frescoes and architectural masterpieces. This marble is a seductive white marble with accents of grey, several added strips of dark grey, pale blue and cream veining. From the modern to traditional aesthetic this elegant and sophisticated natural stone is the perfect complement to any design, suitable for living room, kitchen, office, public bathrooms and shops.

## Luxury Clichè

This very special marble is extracted in the north of Tuscany, in the land of Carrara, only from a single mountain called Calacatta. This stone is famous for the bold dramatic grey veining on the pure white background. A lot of famous artists loved to carve their statues in this precious stone for the “uniformity” of the veining: Calacatta was the favorite marble of Michelangelo. We can find this white marble in churches, cathedrals and castles in every part of Europe, as the Basilica of Sacré Coeur in Monmatre.

Delicately Rich

Calacatta Gold is a precious marble extracted in Italy, in only one quarry in the world, near the Carrara area. This marble does not follow a linear pattern: The peculiarities of this rare stone with a brecciated structure are the dramatic and unstructured golden veins on the white butter background. The special color tone warms up every ambience, giving an elegant and lighter appearance, especially in bathrooms, SPAs or hotels. The “movement” of the veining finds its maximum expression in large surfaces, like floor and wall coverings.

Kashmir granite is a granite from India. The white surface is dotted with streamline texture, which has a strong sense of hierarchy. It is easy to find that there are also dark patterns of color in it. Black and white are not real black and white when viewed from a distance. The lines contain dark green and dark blue, while the hidden colors in white are light yellow and light blue. With soft curvilinear beauty, they contain a kind of beauty of Yin-Yang(Taiji), which is in line with the traditional Chinese culture of "Tao generates all things". It can be used to decorate high-end outdoor balcony and as table top.

## Precious Beauty

White marbles can trace its history to Mounts Apennine, Alps and Apuan in regions of Tuscany in northern Italy all the way to the Jurassic Era over 190 million years ago. Lime sediments undersea brought tremendous changes to the crystal structure of rocks and uncovered the most precious marble treasure in the world. During the Renaissance in the 15th century, Sculptor Michelangelo spent 9 months at Mount Apennine, adjacent to mount Cararra, in search of marble with vitality for completing his sculpture ---David. "I saw the angel in the marble; I carved until I set him free." He finally presented to the world one of the greatest statues. Sculptors such as Michelangelo, Leonardo Da Vinci often-used the most premium white marbles in the world, including Statuario Calacatta: which originates from Mount Apuan, featured with natural carving patterns.

## Precious Beauty

Quarried in Turkey, one of the oldest marble production regions experiencing 4000 years natural stone production. Claros Grey (dark) marble is a beautiful dark grey stone with thin white light veins drawn randomly in it. Its neutral grey subdues the surrounding while the natural beauty of this stone imparts an air of elegance to the space that few marbles can compete with. Due to the stone's beauty and bold modern look, interior designers are choosing Claros Grey (Dark) around the globe for decorating bathroom walls, accent walls, living rooms, and kitchens. This product is also used for flooring purposes and other outdoor uses.

## Pleasant Illusion

Like the rocks where is quarried, this marble is a perfect mix of beige, white and grey shades. The cold beige background and the random distribution of different lines captures the beauty of nature. Extracted in Turkey, Cloud Grey is a very quiet and elegant marble that finds application in luxury interiors and modern settings. The neutral color enhances natural materials, Cloud Grey is beautiful combined with copper, wood, bomboo and leather. The beauty of this tactile material is in the fact that is strong and soft at the same time, like a snowy mountain top.

The Taurus Mountains are a mountain complex in southern Turkey, dividing the Mediterranean coastal region of southern Turkey from the central Anatolian Plateau. Silver Fantasy limestone buried deep in the Aladaglar and Bolkar mountains has eroded to form karstic landscapes of waterfalls, underground rivers, and some of the largest caves in Asia. In 333 B.C., Alexander the Great believed cities shall remain the shape of eyrie, therefore he preserved the cities instead of conquering or changing them. Termessos was a Pisidian city built at an altitude of more than 1000 meters at the south-west side of the mountain Solymos in the Taurus Mountains.

## Endless Elegance

Botticino Semiclassico was the most precious marble in the Republic of Venice in 17th century. While in Lombardia ruled under Austro-Hungarian Empire, Botticino Semiclassico marked the most prominent marble in Piazza San Marco. It was sourced from the mountainous area of Alps to the south of Lago di Garda---Brescia. Brescia is located in the region of Lombardy and is believed to be one of the birthplaces of violin. Cultural relics in Roman Empire, polis and castles in medieval times, world heritages such as Roman Forum and San Salvatore Church are all built with Botticino Semiclassico.

# ROMAN JADE

香格娜米黄

Number: D\*2876BM/BS/NB

## Neutral Dynamism

The essence of the magnificence of Rome is captured by this beautiful travertine. Roman Jade is a limestone quarried in the area of Tivoli, only 30 kilometers far from the center of Rome. This particular white calcium-carbonate rock has an important historical meaning, this material was one of the favorite stone of Lorenzo Bernini and Michelangelo. The warm color of Roman Jade is lined in white, beige and ivory, the alternation of the colors creates the typical depth of this timeless limestone.

SOFT MARFIL  
600X900mm

# SOFT MARFIL

奥特曼米黄

Number: D\*2891BM

## Unconventional Simplicity

This marble from the region of Valencia is a soft beige stone, with an extremely attractive and warm color. Soft Marfil is one of the most popular Spanish marble. The versatility and the uniformity of the yellowish color make the Soft Marfil perfect for large flooring, coverings or details. The occasionally irregular veins enrich the light beige background of this precious stone quarried only in Mount Coto and Mount Zafra near the town of Pinoso. Due to its uniformity very often Soft Marfil is used in combination with darker or colored stones.

## DIAMOND BLUE

宝石蓝

Number: D\*8883BM

Pure Infinite

Diamond Blue can date back to 150million years ago. It consists of marble granite formed in the Cretaceous Age from Andes mountain range, the longest continental mountain range in the world. 28 million years ago, the volcanic outbreak and earthquake triggered by crustal movement lifted the elevation of Andes up by 1500 meters. In the ice age of 2 million years ago, Lago General Carrera, located in the border of Argentina and Chile, generated a spectacular natural landscape palace of Diamond blue marble-Marble Chapell after tremendous changes caused by glacier, moraine lake, glaciers melt, small particles crystallization, enabling us to appreciate the geological wonders thousands of years ago. Sky-blue caves and precious diamond blue marble are rare to be found. GANI, specializing in the research and development of blue crystal dry granules and crystal quartz, pioneered the creation of Diamond Blue around the world and pushed forward the aesthetics of global architectural design into new height by simulating early crustal movement and adopting computerized craftsmanship.

## Cerulean Untidiness

New Azul Bahia is quarried in Brazil. This blue product is based on dark blue, which makes it looks like surging waves on the blue sea, conveying a sense of dynamic and mystery. Irregular lines and dispersed dots without specific orientation creates a quiet atmosphere, which is the preferred texture for blue product application to the wall and floor. The atmospheric texture makes the product suitable for large-scale paving of bathroom, public areas and other design projects, highlighting the sense of design and modernity of the space.

## Precious Beauty

Rosa Norvegia Marble is a kind of pink marble quarried in Norway. It is a metamorphic rock resulting from regional or at times contact metamorphism of sedimentary carbonate rocks. Rosa Norvegia marble is a commercial name for a fine to medium-grained, white-pink magnesian marble. It is characterized by an interesting light pink background color and delicate whiteness, forming uniform patterns on the natural stone. Its extremely vivid and warm-toned patterns make it a favorite decorative material, suitable for pink/red theme shop and restaurant, artworks and theme hotel rooms.

## Granite Energy

Mount Montagnola, stretched over Siena city in central Italy, is clad in sunflowers, hollies, castanea mollissimas and honeysuckles. In Triassic Era over 250 million years ago, the golden breccias buried in the metamorphic stratum of Mount Apennine gave birth to the splendid sunflower-looking marble---Giallo Siena. In 301 AD, Roman Emperor Diocles claimed Giallo Siena as the royal special marble. Nowadays we can still perceive the elegance of Giallo Siena in Florence Duomo Cathedral and Florence Library. GANI Giallo Siena, produced with giallo ores and GANI unique craftsmanship, revives the magnificence and grandeur of royal marble.

Timeless Charisma

Quarried in Italy, this elegant marble is a natural black stone with unique intense golden veins. In Roman times, it made extensive use of marble in Portoro imperial villas and probably was also used in the construction of the temple dedicated to Venus on the end of the Gulf of La Spezia on which it was built after the church of San Pietro. The name derives from Portorož, Italian translation of the French term or doors ("golden door") with which it was called during the French domination. Originally it was called "mixed yellow and white", was later named "Jade of Portovenere." This rock is very elegant and refined, one of the most luxurious marble.

## Elegance and Balcanced

Nero Marquina Marble originated from Markina Mountain in the basque region of northern Spain. The Basque Mountains (Montes Vascos), located in the northern Iberian Peninsula and the eastern Pyrenees, is geologically considered as the“ Basque Threshold” orogenic belt. Nero Marquina whose elegant and exquisite white clouds texture integrated with mountains covered by dark forest, presented a black-and-white perception, created an aesthetic effect that enshrines the unity of man and universe, and delivered unparalleled imagination and creativity. For this reason it was considered as a high-quality black marble and favored by global designers. Because of the marbles ‘elegance and esthetics, the world Design Pritzker winner Mr. Frank Gehry use it to design “Marques De Riscal” and Mr. Santiago Calatrava did the same for his Ysios Winery in Basque Mountains.

BIANCO VENATO  
经典雪花白

Number: D\*2826SN

Bianco Venato reproduces the original textures of natural rocks along the western coast of Italy. The grey and white texture stretches in varying depths, which enriches the sense of space and brings grace to the ordinary life. It is favoured by lots of designers. So you can see it not only in Roman Forum, St. Peter's Basilica, and the Piazza delle Erbe.

# JAS TUFF

罗马假日

Number: D\*2840SP

Jas Tuff, quarried in Turkey, gives people a harmonious and unified visual experience. The grey-yellow background is so soft and warm that injects elegance and style to the whole area, relieving people from stress. Its tone can be matched to all colour schemes and versatile home styles. The application of Jas Tuff can be seen in buildings such as the Hagia Sophia, the Castle Hotel, and the Golden Lodge Holiday Manor.

# LOCKE BLUE GREY

碧海伽蓝

Number: D\*8887SP

Locke Blue Grey is an abstract display of waves of the endless sea. It is carefree and easy-going, mysterious, and vibrant, adding a few touches of vitality into the space. Its color contrast injects natural vibrancy and agility to your house. The large-area continuous pattern restores the natural vibe of the stone, where you will feel the blessing of nature.

# LOUIS GREY

秦川沃野

Number: D\*5901SP

Louis Grey is inspired by the veining pattern of natural rocks in Tuscany, Italy. Being quiet and sedate, the grey veining pattern integrates itself into the European fashion. It varies and extends in texture and in depth. The irregular white and grey lines create an expanded home space for unlimited sparks of inspiration. You can find its application in the Leaning Tower of Pisa, Palazzo Vecchio, Hotel Cala di Volpe, etc.

# MAUI GREY

英格兰灰

Number: D\*5902SP

Maui Grey comes from the unique texture of the reflection of Caerphilly Castle on a lake. The overall design is grey, but the intricate changes are displayed through the gradual change of light and darkness. The product contains history and culture, and incorporates quietness and high quality into the details of your house. The warm grey tone is low-key and bears warmth, suitable for multi-space applications.

ADVANTAGES OF GANI MARBLE TILES IN DRY-HANGING CURTAIN WALL

A curtain wall system consisting of supporting structures and panels is an outer covering of a building which does not carry any dead load weight. Since it hangs like a curtain, it is also called the hanging wall. It's a light weight wall with decorative effect for modern high-rise buildings. Curtain wall does not bear any dead load weight from the building other than its own one but merely protect the building from wind loads, earthquakes and temperature variation.

Un sistema de Pared de Cortina consistente en estructuras y paneles de soporte es un revestimiento exterior de un edificio que no lleva peso de carga muerto. Puesto que cuelga como una cortina, también se llama la pared colgante. Se trata de una pared de peso ligero con efecto decorativo para edificios modernos de gran altura. La pared de cortina no soporta ningún peso de carga muerto del edificio distinto del propio, sino que simplemente protege al edificio de cargas de viento, terremotos y variación de temperatura. Por lo tanto, los paneles de la pared de cortina deben ser duraderos y resistentes a la intemperie.

Sistema per facciate continue costituito da strutture e pannelli atti a formare un rivestimento esterno che non porta alcun peso proprio. Poiche` si ancora come una tenda, questo tipo di struttura e` chiamata anche facciata sospesa. E` una parete leggera con uno spiccato effetto decorativo indicata per i moderni grattacieli. Sulla facciata non grava alcun carico dell'edificio se non il suo stesso peso, ma collabora con l'edificio in caso di forti carichi del vento, di terremoti e di variazioni di temperatura.

Therefore, panels of curtain walls must be weather resistant and durable.  
Normal classification of curtain wall: glass curtain wall; metal curtain wall; porcelain plate curtain wall; stone curtain wall.

Por lo tanto, los paneles de muros cortina debe ser resistente a la intemperie y duradero.Selecciones comunes de la Pared de Cortina: pared de cortina de vidrio; pared de cortina de metal; pared de cortina de porcelana; pared de cortina de piedras.

Pertanto i pannelli devono essere resistenti alle intemperie e duraturi.  
Classificazione generica delle facciate continue: facciata in vetro, facciata in metallo, facciata in ceramica; facciata in marmo.

External radiation Radiación exterior Radiazione esterna	Ir ≤ 1,3	Ir ≤ 1,2	

INSTRUCTIONS

TRADITIONAL FLOOR LAYING

Laying big slabs requires similar laying conditions to those required for traditional format slabs. requires the adhesive to be applied both on the setting bed and on the back of the slab.  
slabs for flooring require the following conditions:

- A flat surface;
- Clean and free from dust, scraps and any lumps of cement;
- The setting bed must be uniform and have already undergone the drying shrinkage process;
- Repair of any cracks;
- Any uneven parts on the surface must be filled with suitable levelling compounds.

Instruments required

- Cement-based powder adhesive for full spread, class “C2E according to EN12004 and S1 according to EN12002 standards”;
- 3x3 mm square toothed trowel and 15 mm round toothed trowel;
- Frame with suction cups for handling or double suction cups;
- Non-bounce plastic mallet 170x370 mm;
- Levelling system: base clip + wedge + pliers.

Processing stages

BONDING TO THE FLOOR

- 1) Ensure that the surface to be covered is solid, flat and free from dust and oil/grease.
- 2) Use the adhesives described above mixed according to the specifications indicated in the technical data sheet of the chosen adhesive.
- 3) Spread the adhesive onto the surface to be covered with a 15 mm round toothed trowel across an area of 5/10 cm more than the dimensions of the slab.
- 4) With the slab in a vertical position on the handling frame, spread the adhesive onto the back of the slab with a 3x3 mm square toothed trowel.
- 5) Using the frame with suction cups, bring the slab into a horizontal position and lay it.
- 6) To guarantee uniform bonding of the slab, the special 170x370 mm non-bounce plastic mallet must be used, tapping from the middle towards the edges so as to remove any air pockets between the back of the slab, the adhesive and the surface to be tiled.
- 7) Using the levelling system.

LEVELLING SYSTEM

The levelling system aims to guarantee perfectly levelled floors simply and quickly, eliminating any unevenness between the slabs. The levelling system is strongly recommended for laying slabs.

Instruments required

- Base clip;
- Wedge;
- Adjustable pliers for installing floors/wall tiles.

Application of the levelling system

Positioning the base clip:

a) After spreading the adhesive, insert the base clip below the slab on the 4 sides.

b) Depending on the format of the slab, position one or more supports for each side of the slab.

c) Position the slab.

Inserting the wedge:

a) Insert the wedge in the slot of the support, taking care not to exceed the breaking point.

b) To make inserting the wedge easier, it is recommended to use the adjustable pliers.

Removing the support:

a) Once the adhesive has dried, the protruding part of the support can be separated from the base clip by tapping with your foot in line with the joint.

GENERAL ADVICE FOR GROUTING

Pay attention while choosing joint sealants: check the technical sheets, choose them shadematched and follow carefully the recommended cleaning times, as many new generation coloured sealants contain pigments and additives that can be very strong. For polished/glossy surfaces do not use epoxy grouts or synthetic based flexible mortars and do not add additives/latexes to the grout, as they make the removal of residues with standard detergents very difficult.  
However, should you decide to use them, it is recommended to make a previous test off site.
