GANI INFINITY

900x1800MM / 900x2700MM

CONTENTS

ONE PIECE TO THE CEILING
SPACIOUSNESS UNINTERRUPTED

GANI NEW PRODUCTS RELEASE · 900*2700MM NATURAL INFINITY SERIES

Seamless-joint continuous pattern.
Infinite beauty in sight.

One piece to the ceiling.
Spaciousness uninterrupted.

Frosted texture on the finishes.
Softness felt.

PRODUCT CONCEPT

To offer people a greener living space of natural beauty, GANI MARBLE TILES has launched new products – 900x2700mm Natural Infinity Series.

It duplicates the subtle and soft variations of the concave texture, and reproduces the natural beauty of rocks with unlimited connected veins.

⬡ One piece to the ceiling. Spaciousness uninterrupted.

⬡ Frosted texture on the finishes. Softness felt.

⬡ The anti-virus tiles Inhibits bacterial growth.

COMPANY PROFILE

GANI was established in 2002, In 2009, GANI has created marble tiles, a revolutionary decorative materials that gives birth to a new category of tiles for the whole industry of building materials, and thus provides a fresh choice for highend decoration. Gani has always adhered to the protection of the world's rare stones and the unremitting pursuit of natural marble decoration effects. Gani pioneers in marble tile technology innovation, and is committed to developing the world's best marble tiles. GANI has been focusing on marble tiles for 14 years. GANI pursues perfection, keeps innovating, puts customers first, devotes himself to people's better life.Through the research and innovation in materials, technology and design, GANI strives to meet the needs of customers, from usability to decorative effect, from humanities and art to natural beauty.

GANI SEAMLESS JOINT PAVING

KEY WORDS:
GAP0.7MM, NATURAL STONE EFFECT, SPACE AESTHETICS, EXCLUSIVE BY GANI

● Gap can be controlled within 0.7mm of seamless joint paving services, which can effectively implement the marble tile paving effect like natural stone, owning the sense of oneness, so that GANI obtains more advantages in showing products effect.

● From a tile to a space, GANI provides a perfect solution for space aesthetics.

● The ultimate experience of product, service and effect.

Why does GANI achieve seamless joint paving technology?

A. GANI products are more flat, of which flatness and other dimensional deviation control within 0.5mm, 10 times stricter than the national standard, and double higher than the industry advanced enterprise standards;

B. Lower water absorption rate of 0.02-0.03%, better than ordinary ceramic tile of 0.5% water absorption rate;

C. Smaller thermal expansion coefficient of 6.8*10-6 to 7.0*10-6℃ -1, lower than that of metals, steels and other materials.

D. GANI adopts seamless joint paving construction standard, is developed with Italy construction expert, Claudio, to ensure the safety and effectiveness of construction.

What is the advantages of GANI seamless joint paving technology?

Normal tile paving needs to reserve 1.5-3mm expansion joints, GANI seamless joint paving can be made within 0.7mm, which is much closer to the decorative effect of natural stone and board.

Will there be any bulging after seamless joint paving?

The probability of bulging by traditional seamless joint paving technology is higher later, with rate of more than 20% . GANI seamless joint paving technology, with the world's leading construction standard of Claudio, Italy construction expert, is strictly in accordance with the standard from base surface to the bottom material of tile, achieving superior effect than European acceptance standards, of which less than 5% of floor bulging rate and 15% of wall bulging rate.

Will tile be bulging or deformation by heat-expansion and cold-contraction?

The impact of the tile deformation has three factors:

One is screed floor and semi-wetting mortar layer under tile; the second is the bonding layer; the third is the ceramic tile itself, while shrinkage of tile is the smallest because of high temperature forging, we do not have to worry about its deformation. Secondly, the shrinkage rate of the screed floor and semi-wetting mortar layer is low. Last but not least, the biggest contraction is the bonding layer, especially when traditional paving usually used with cement paste, like our common cement road surface which is easy to crack.

Therefore, most of the extrusion and arching are caused by cement paste, which is also the reason why Europe can not use cement for tiling.

There are two technologies for GANI to avoid problems caused by heat-expansion and cold-contraction:

(1) The first is the bonding layer used with a proprietary binder instead of cement paste, which is the exclusive developed by GANI, Claudio and BQT company. Its shrinkage rate is 70% lower than cement paste ;

(2) Reserve 1-2cm gap for expansion when floor paving so as to keep cooling space.

Remarks: the materials and adhesive is developed special for China market, for international use, should be applied accordingly to local practice and standard.
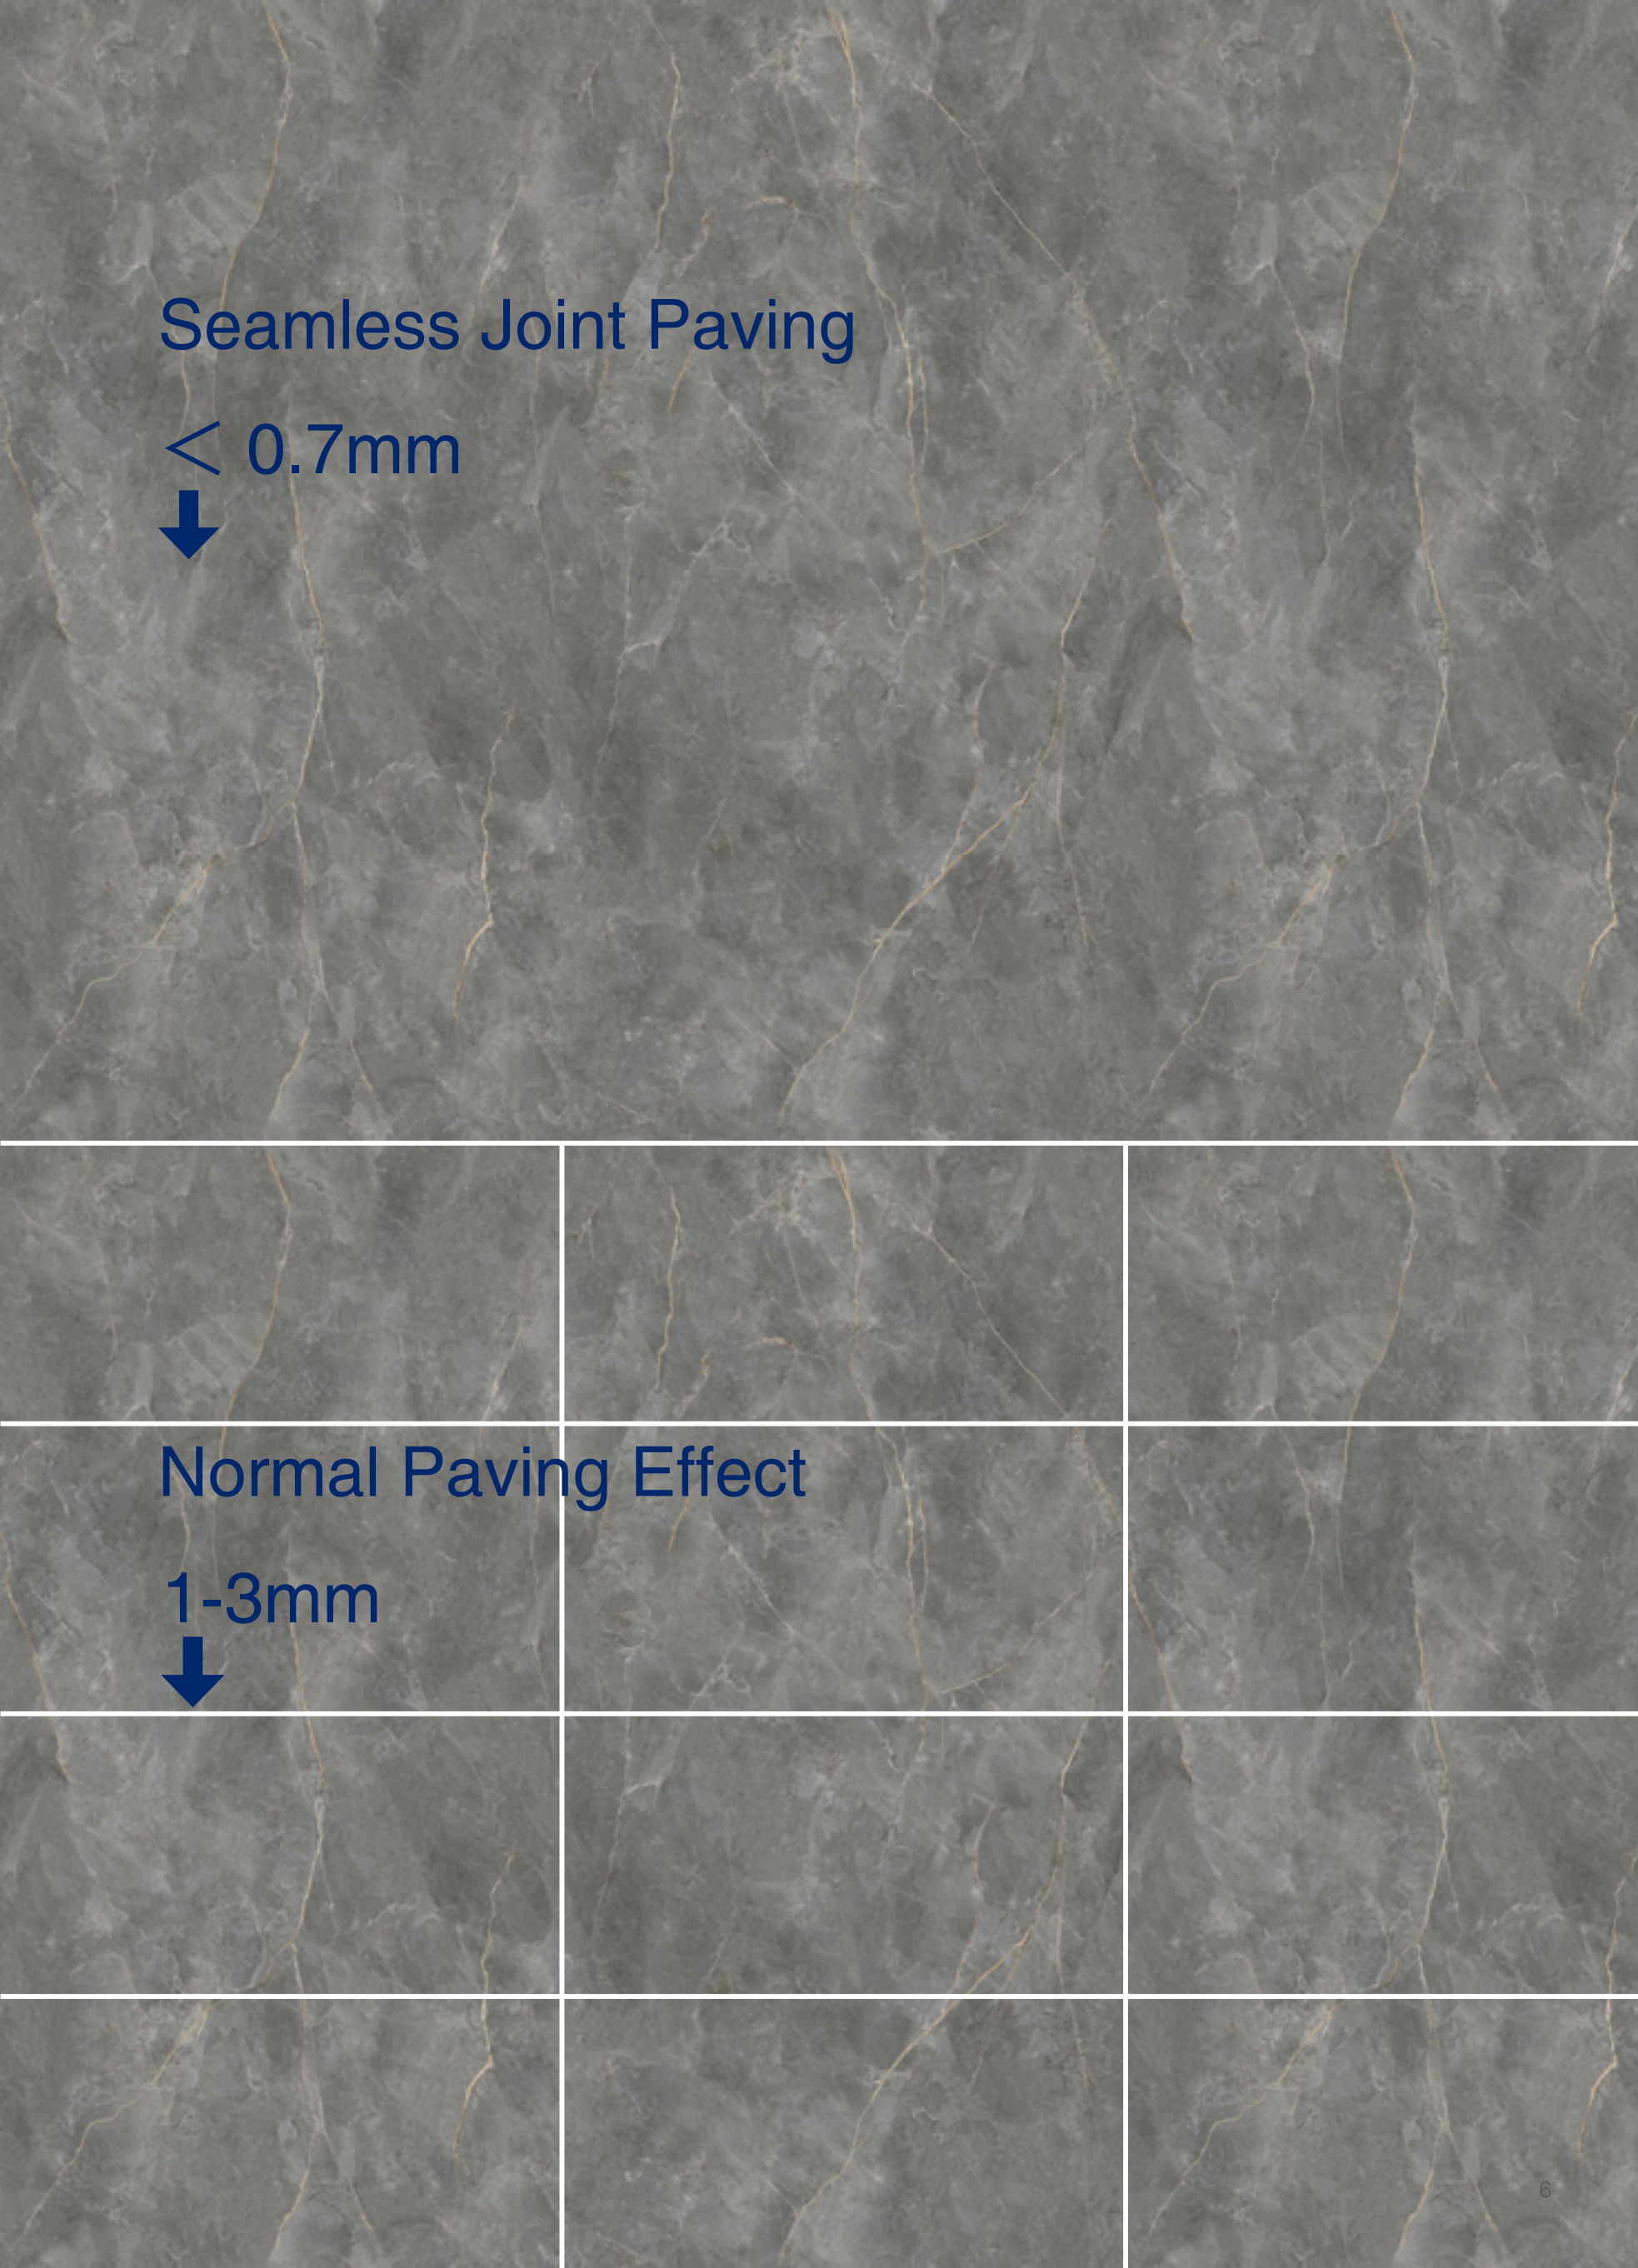

FLATNESS	CTE	WATER ABSORPTION

WATER-JET MEDALION

Element: Purple Dahlia - courage, perseverance, romance.

Inspired by Dahlia, the silhouette is transformed into a full and dignified circular pattern, combined with smooth lines and geometric figures, highlighting the visual changes brought by the pattern. The wall pattern is simplified, reorganized and arranged repeatedly to show the romantic temperament of European style. It has a symbol of generosity and richness.

The colors are white and transparent (Statuario Calacatta), introverted grey (Fior di Pesco Carnico), mysterious and noble black (Laurent Black), and elegant GANI blue (Azul Bahia) ornament.

FUNCTIONAL PRODUCTS

STAIRCASE

Staircases have several modular designs, such as lighting panels, voice control, APP control and other intelligent control system.

Functions:
- Water-proof, stain-proof, moisture-proof and leakage-proof electronic parts.
- Modular design. Easy to maintain, install and disassemble.
- Non-slip panels with good light transmission, strong bending resistance, and high hardness.
- Self-control lighting effects and the lighting control intelligent system.

FURNISHINGS

Furnishings are equipped with intelligent system such as wireless charging, induction cooker, electric socket, etc.

Functions:
- Water-proof, stain-proof, moisture-proof and leakage-proof electronic
- parts with long service life.
- Modular design. Easy to maintain, install and disassemble.
- Easy to clean. Stain-resistant.
