

Current Clamp SDQ20

Current Clamp is a high-precision AC current converter, and can meet a variety of measuring instruments, It can be used along with many kinds of instruments and devices, such as energy meter spot calibrator, multifunctional meter, oscilloscope, digital multimeter, dual clamp Ground resistance tester, dual clamp phase volt ammeter. Parameters will be measured and compared without power supply cut-off on account of the split core.

1. Features

Independent jaw, clamping more tightly

fine grinding at the side of jaw, ensure the good performance after long-time and frequent clamping.

A few colors available: red, yellow, green, black

Plug and socket at the end of cable can be matched on request.

2. Specification

Model No.	Rated Current	Output Current	Turns Ratio	Accuracy	Load	Cable Length	Working Temp.
SDQ20	5A~200A	100mA/200mA or on request	1:1000 1:2000 1:2500 On request	Class 0.1 Class 0.2	< 4Ω	250cm, or on request	ABS Casing: -30°C~+60°C PC Casing: -40°C~+100°C

3. Dimension
