# DH SERIES MACHINE

DH series is our newest industrial grade 3d printer with strong performance. The representative-ness advantage is that the machine has integrated metal shell and 420°C high temperature nozzle, which can print high shrinkage filament, such as: PEI, ABS, PBT, Carbon fiber, etc.. The constant temperature chamber with high-temp heating bed can effectively ensure that the model is not warped and deformation, it will have a better use experience.

## HIGH APPEARANCE

Industrial style body with visual door opening structure to show the ability

## HIGH COMPATIBILITY

Basically can print all 3d printing filament with high performance

## MORE ADVANCED

Self-developed operate system and slice software, easy to operate

DOWELL 3D DH SERIES 3D PRINTER

## BEAUTIFUL AND DURABLE THICKENED METAL SHELL

DH series 3d printer all use metal shell with a stable operating system. About 50 db ultra-low noise and durable

## MORE FILAMENT PRINTABLE 420° C HIGH-TEMP NOZZLE

Carbon fiber, PEI, ABS etc.. need to be melted at high temperatures. DH series standard with high-temp nozzle basically can print all filament. Patent anti-collision nozzle double protection is safer.

## PREVENT WARPING AND DEFORMATION 60° C CONSTANT TEMPERATURE CHAMBER

DH series machine can not only print high shrinkage 3d filament, which will effectively prevent the model warping deformation.

## MORE STABLE AUTO LEVELING

Using industrial grade linear guide and ball screws to keep high operating accuracy. Automatically detect the flatness of platform and correct the inclination, with self-developed leveling algorithm, which will meet the real auto leveling.
