

#### **Product Description**

- ♦ MOSFET Output
- ◆ Low Impedance
- ◆ Panel Mounted
- ◆ LED Indicator
- ◆ RoHS Compliant

### Ordering Information

KSJD

KSJD Series 30

Load Voltage 30:30VDC D

DC Control

10

Load Current 10:10Amp 40:40Amp -24

Control Voltage

General Specifications			
Input Specifications(Ta=25°C)			
Control Voltage Range	9.6-28.8VDC		
Must Turn-on Voltage	9.6VDC		
Must Turn-off Voltage	2VDC		
Maximum Input Current	15mA		
Maximum Reverse Voltage	-28.8VDC		

Output Specifications (Ta=25°C)		
Load Voltage Range	1	9.6 - 28.8VDC
TVS Breakdown Voltage Scope	1	37.1- 41V
Load Current Range	10A	0.002 - 10A
	40A	0.002 - 40A
Maximum Surge Current[@10ms]	10A	80A
	40A	200A
Maximum Turn-on Time		500µs
Maximum Turn-off Time	 	500µs
Maximum On Resistance	10A	14mΩ max.( @TA=25°C)
	40A	3mΩ Max.( @TA=25 °C )
Maximum Off-State Leakage Current@Rated Load Voltage (mA)		0.1mA

General Specifications (Ta=25 C)		
Dielectric Strength[50/60Hz]	Input & Output / Base	2000Vrms
Operating Temperature Range		-30°C ∼ +80°C
Storage Temperature Range		-30°C ∼ +100°C
Weight[Typical]		150g

#### **General Notes**

- 1. Relay must be mounted to proper sized heat sink based on thermal curves. Thermal grease or a thermal pad must be used between relay.
- 2. When connecting wiring to SSR please ensure screws are torqued down properly. Recommended torque for input screw is 4.43/0.5 in-lb/N·m, output screw is (18-20)/(2.0-2.2) in-lb/N·m.
- 3. When the operation temperature is above 25 C, please consider the derating as per the Thermal Derating Curve.
- 4. Please ensure reliable grounding when using the SSR.
- 5. Control polarity must be observed. Otherwise, it may cause damage to the relay.

## ! Warnings

- 1. The product's side panels may be hot, allow the product to cool before touching.
- 2. Disconnect all power before installing or working with this equipment.
- 3. Verify all connections and replace all covers before turning on power.
