

## HW-507-B

## Operating Table

## FEATURES

- This operating table adopts electric hydraulic control, which is convenient, flexible, and stable to operate.
- Suitable for performing surgeries and examinations in thoracic, abdominal, neurosurgery, ophthalmology, otolaryngology, obstetrics and gynecology, urology, spine, etc., it is a comprehensive surgical equipment.
- Designed for ophthalmic and neurosurgical surgeries with ultra-low positions, doctors can perform seated surgeries.
- The countertop is divided into five sections: head board, back board, hip board, leg board, and foot board. The head and leg sections can be interchanged to fully meet the needs of various surgical positions.
- The countertop is equipped with a back panel and hip panel composite bending button, providing convenience for surgeries such as gallbladder and kidney.
- The operating table is equipped with casters for easy dragging and retraction.
- Two independent hydraulic drive systems ensure that in the event of a malfunction in one system, the operating table can activate the other backup system.
- The surgical bed can be powered directly by a power source or by a rechargeable battery (charging for 6-8 hours can meet the needs of 80-100 surgeries).
- The edge rails, base, and pillars of the operating table are made of high-quality stainless steel, which is corrosion-resistant, easy to clean, and durable.
- The T-shaped base design provides the operating table with high stability and good mobility, and provides doctors with greater foot space, reducing fatigue caused by long-term surgery.
