

# Stainless steel Floor Traction Frame

## Stainless steel floor traction frame

Orthopedic traction frame is a kind of supporting product for operation table which is widely used in orthopedic surgery. All kinds of body position conversion and traction action of the product are controlled by manpower and realized by mechanical transmission mechanism.

---

### Technology Parameter:

Traction Frame Length - 1600mm

Traction Frame Width - 530mm

Traction Frame Height -  $\leq 670$ mm

Lifting range -  $\geq 400$ mm

Traction range -  $\geq 250$ mm

Knee Crutch Lowest Elevation -  $\leq 1050$ mm

Traction range:rotation(up&down) -  $120^\circ$

Horizontal outreach of body frame -  $\geq 180^\circ$
