Locating design. Perfect experience. The beauty of industrial design.

STEP - 01 -

Pre-drilled holes in the top panel

Please note that the cabinet installation size, this product is suitable for cabinet length and width $\geq 900\text{mm}$.

Measure and mark the center points of both the length and width of the cabinet top panel.

Draw perpendicular lines at the center points of both sides to confirm the installation center point.

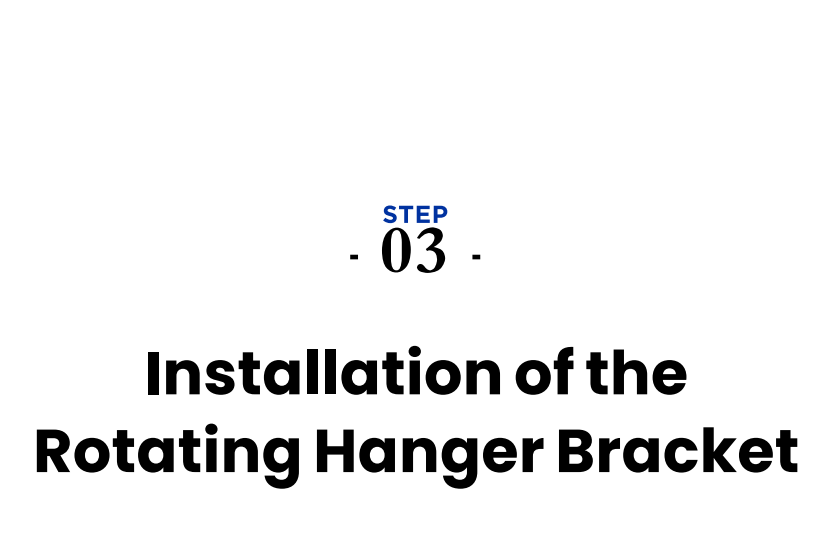

Measure the diameter of the top seat, take the installation center point as the center of the circle, take three points with the radius of the top seat, and draw the installation position of the top seat of the clothes rack.

Pre-drilling, after the top seat is aligned with the installation position, pre-drill the holes in the screw holes, and erase the traces of the drawing line after the pre-drilling is completed.

STEP - 02 -

Installation of the top support tube

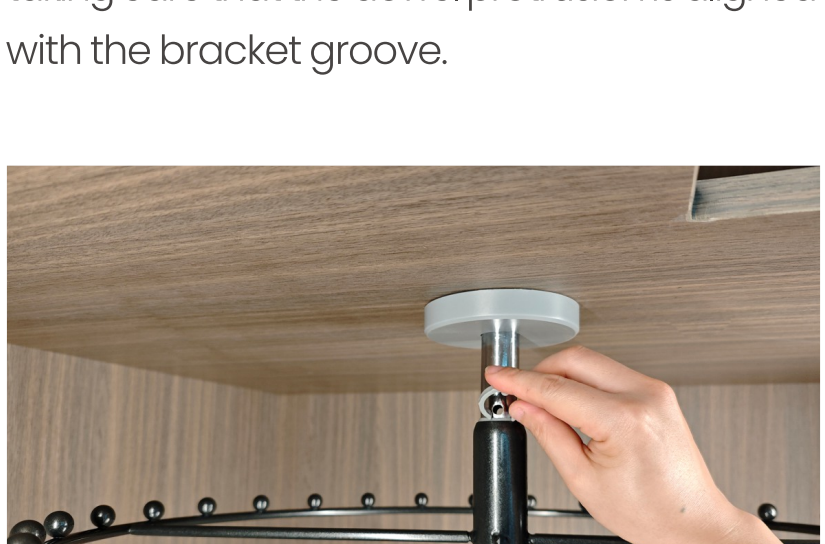

Place the top seat into the inner decorative cover, align the pre-drilled holes and lock the self-tapping screws.

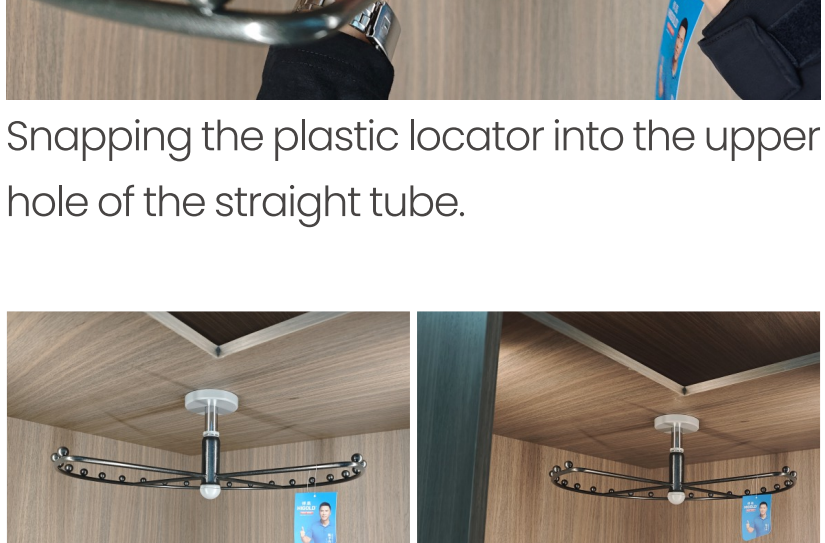

Put the outer decorative cover into the support tube so that the clips are aligned with the grooves of the inner decorative cover, push it upward and then rotate it to the right to install it.

Put the outer decorative cover into the support tube so that the clips are aligned with the grooves of the inner decorative cover, push it upward and then rotate it to the right to install it.

Put the rotating hanger, bracket and decorative half-ball into the support tube of the top seat in order, and pay attention to the holes of the decorative half-ball to align with the holes of the support tube.

Insert the dowel into the support tube hole, center the dowel and then lower the bracket, taking care that the dowel protrusion is aligned with the bracket groove.

Snapping the plastic locator into the upper hole of the straight tube.
