# Projects Cases:

## Production

Our well-trained QC team select good blocks and inspect every piece of slabs.

We apply the best quality glue to the stone which has a significant effect in dealing with defects and brings bright degree after polished.

After the glue totally permeates into the stone, the stone will be polished with automatic polishing machine and acquires a shiny, reflective appearance.

We pay close attention to every steps for loading & unloading works to ensure a smooth delivery and safe transportation.
