

## WY-024 Suture Diameter Tester

WY-024 Suture Diameter Tester can measure the diameter of medical suture of various specifications.

### Professional technology

- Chinese and English menu display: nominal specification, test deformation, test item, print, test, uplink, downlink, time, calibration.
- Set the parameters and run the test automatically.
- Record wire diameter data and output report automatically, and the test data is printed by the built-in printer.

### Test standard

The instrument is designed and manufactured according to YY0166-2002 and YY0043-2016 standards.

### Test application

<b>Basic application</b>	It is suitable for the diameter measurement of various medical sutures.
--------------------------	---

### Technical index

Item	Parameter
Min graduation value	0.001mm
Presser foot diameter	10mm~15mm
The load of presser foot on the suture is between 90g and 210g	
Various sizes of stitch diameters can be measured.
