

## DZ Series Vertical Vacuum Sealer (gas filling)

### i. Applications

The JL series vertical vacuum sealer is a non-vacuum chamber design vacuum machine. It's suitable for vacuum packing foods, clothes, chemical material and electronic element.

### ii. Technical parameters

Model	JL600F	JL-700F	JL-800F	JL-1000F
Voltage	220V/380V/50Hz/1KW	220V/380V/50Hz/1KW	220V/380V/50Hz/1KW	220V/380V/50Hz/1KW
Pump power	0.75KW	0.75KW	0.75KW	0.75KW
Chamber size	600*900mm	700*900mm	800*900mm	1000*900mm
Sealing size	600*8mm	700*8mm	800*8mm	1000*8mm
Packing capacity	2-3bags/min	2-3bags/min	2-3bags/min	2-3bags/min
Overall size	700*700*1800mm	800*700*1800mm	900*700*1800mm	1100*700*1800mm
Weight	150kg	160kg	180kg	195kg

### iii. Function and features

- \* Double air tab design, high working efficiency.
- \* Made of food grade 304 stainless steel. Clean and longer service life.
- \* Holding table is adjustable, height range:30-900mm.
- \* Oil/water separation system, protect the pneumatic elements.
- \* Gas filling, explosion-proof function is optional.

#### Pneumatic Element

Use Taiwan Airtac pneumatic elements stable performance and long service life

#### Control Panel

High performance control panel, easy to change the parameter setting

#### Protection Switch

Cut off the electricity immediately when machine has problem

#### Filter

Ultra large filter, effectively protect the vacuum pump

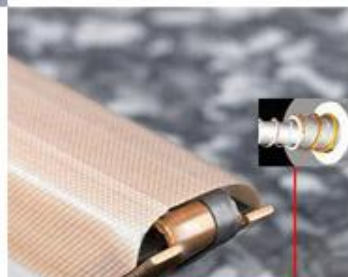

#### Transfermer

Use red copper core wire material, good quality

#### Heating Device

Built-in spring, auto adjust extend the service life
