

LCS-18T Electronic Flow Scale

i. Applications

Used for accumulating volume in the area of the grain processing, chemical, grain depot, port etc

ii. Technical Parameter

Model	LCS-18T
Capacity(T/h)	≤18
Hopper Capacity	50
Accuracy grade	0.2
Power	AC 220V 50Hz 70W
Air, expenditure	0.4~0.6MPa 1m ³ /h
Height (mm)	2100

iii. Function and Features

- to set the receipt, delivery mode;
- total flow rate can be set to automatically stop after reaching the set value;
- Adopt material level control system that can automatically adapt to the next process speed;
- All closed design of weigher body and the control box, get rid of dust
- Dual layer structure for stable running
- Imported stainless steel material for inlet and weighing box
- With Level control system, ensure the smooth running and no blockage
- Reserve RS232/485 interface
