

Piezo Haptic Actuator

- Achieve advanced seamless design
- Better dust/ water proof
- Longer life time and better experience

Piezo Haptic Actuator

Piezo Haptic Actuator is an operational interaction sensor. The function, scene or application set in the device will be waken up by touching or pressing with a little force. Short term press and long term press will be able to customize different gestures and wake up functions or applications.

Application

- Display touch panel
- Switch
- Interior decoration

AUDIOWELL | SENSOR TECHNOLOGY

Item	HY0066
Electromechanical coupling coefficient K_p	>0.65
Loss $tg\delta$	$\leq 4\%$
Curie temperature T_c	$>300^\circ\text{C}$
Frequency temperature stability	$< \pm 0.7\% / ^\circ\text{C}$
Dielectric loss ($tg\delta$)	$\leq 4\%$
