■ QP5230(CE标准)

- 整机采用SUS304不锈钢材质。
- 每块2.5-25kg、-4℃~-18℃的冻肉，可快速直接切成块或片状，是斩拌机和绞肉机前道工序。
- 使用该机能避免在缓化过程造成污染和营养成分流失，保证肉的鲜度。又可省去加冰制冷工序，降低用户的制冷费用。
- 设有自动保护装置。
- 具有原料肉操作平台，方便省力。滑道置于料槽之外，不会出现污染原料的情况。
- 采用整体焊接结构，机器稳定、性能佳。
- 可配标准料车，不会出现切片时向外飞溅的情况。
- The whole machine adopted SUS304 Stainless Steel.
- One piece of 2.5-25kg, frozen meat of -4℃ to -18℃ can be directly cut into slices. It is pre-procedure of cutting and mixing machine and meat grinder process.
- Avoid pollution and nurturance lost at slow thaw process. Ensure freshness of meat; No icing and refrigeration process, thus reduce user's cost.
- Auto-Protection designed.
- Special designed table to put frozen meat on that can reduce labor intensity of worker. Frozen meat block can easily put in the channel.
- Wholly welded machine body stable and low noises.
- Working with standard skip cars, no splash during slicing.
