

DRT 耐根穿刺防水卷材

DRT root-resistant waterproof membrane

产品概述

DRT 耐根穿刺防水卷材是以聚酯毡为胎基，以添加进口化学阻根剂的改性沥青胶为涂盖材料，以聚乙烯膜为表面材料制成的具有优异阻根性能的防水材料。产品具有优异的阻根性、防水性，可有效阻止植物根系穿透防水层，保证整体防水体系的完整性。

Description

DRT root-resistant waterproof membrane is a waterproof material including PET mat as base, other chemical root-resistance agencies, PE film as surface.

产品特点

1. 具有阻止植物根穿透和防水双重功能，能够承受植物须穿刺，长久保持防水功能。
2. 抗拉强度高，延伸率大，对基层收缩变形和开裂的适应能力强。
3. 可形成高强度的防水层，抵抗压力水能力强。
4. 耐割破、耐撕裂、耐疲劳、耐腐蚀、耐霉菌、耐候性好。
5. 热熔法施工，施工方便且热接缝可靠耐久。

Features

1. Resistance water and root for a long time;
2. Strong strength and elongation, suitable for shrinkage strain and cracks of base;
3. Excellent waterproof film, resistance to water pressure;
4. Resistance laceration, corrosion, nystatin, weather;
5. Hot-melt construction, easy and fast application.

性能指标

Technical Sheet

序号 No.	项目 Item		技术指标 Specification
1	耐根穿刺性能 Resistance root		通过 Pass
2	耐霉菌腐蚀性 Resistance nystain	防腐等级 Corrosion-proof grade	0 级或 1 级 Grade 0 or 1
		拉力保持率, % ≥ Retention rate of tension	80
3	尺寸变化率, % ≤ Rate of dimensional change		1

执行标准/Standard: JC/T1075-2008

适用范围

适用于种植屋面及需要绿化的地下建筑物顶板的耐植物根系穿刺防水层。

Uses

Used in planted roofs and other underground green plated root-resistant waterproof workings.
