Basic Chromium Sulphate BCS-B

by Yucheng Trade, supported by one of the biggest Chromium Salts factory in China.

Product introduction:

Basic information:

Appearance: dark green powder with high tanning properties

Molecular Formula: $Cr \cdot (OH)_m \cdot (SO_4)_n \cdot X(H_2O)$

CAS No. 12336-95-7 / 39380-78-4

EINECS No. 235-595-8

Property:

BCS-B is basic type Basic chromium sulphate tanning powder, which is from the organic reduction process of Sodium chromate mother liquor directly, with free Cr^{6+} ion and low content of impurities. It performs high absorption of Cr_2O_3 during the tanning process and friendly to environment.

Application:

Basic Chrome Sulfate is available in dark green powder with high tanning properties. It dissolves easily in water and is mainly used in the tanning of various leathers and furs. Dosage suggestion is around 6%-8% weight of the tanned leather or furs.

Product specification:

	Item	Specification
	Cr ₂ O ₃ %	25+/-1
	Basicity	33+/-2
	Water insolubles%	≤0.1
	Iron(Fe)%	≤0.05
	PH (10% solution)	2.0-3.0
	Cr ⁶⁺ %	n/a

Package and transport

- Standard package: 25kg/bag, paper-plastic compound bag with plastic bag inside.
- Other packages are available according to customers' requirements, such as ton bag.
- Less container shipment and full container shipment are both acceptable.
- Air transport and express are available for small quality.
