# Advantage

- **FABRIC:** We use high density knitted fabric, Conformable and good stretch treated to give the product a luxurious feel.
- **WORKMANSHIP:** All our products is produced by skilled workers on state of the art equipment making the products stand out as a high end product.
- **PRINTING:** Colorful products sells and we are therefore very experienced in a variety of printing techniques. rotary screen printing, Reactive printing, transfer printing, placement printing.
- **QC and FINISH:** All our goods are QC inspected twice during production and final inspection when the product is finished. This secures that all active wear leaving our factory lives up to customer standards.
- **PRICING:** An impressive production capacity allows us to minimize overhead and give customers very competitive pricing.

# SPORTS BRAS & CAMIS

With a monthly output of about 100 thousand pieces of high end active wear. we are among the strongest active wear manufacturers in China. Our focus on state of art production equipment allows us to increase production capacity and bring the overall overhead down.

@@@ Wicking and quick dry

@@@ Chafe-free flatlock seam

@@@ Soft, thin, sweat-wicking liner

## HOW WE WORK

Time is of the essence when developing new garment today. Clients are promised always to have new samples ready in 7 – 10 days although very complex projects might take slightly longer.

## **QUALITY CONTROL:**

**We manifest and secure a high level of product quality by testing all subcontracted material like fabric before moving into production. Items are further inspected 100% by a responsible QC person before moving of the production line.**

**Manifesting a high level of quality in production lines where every single process is depending on the performance of workers is not always an easy task. We have spent more than 8 years perfecting our own in house inspection. In our production lines each worker is responsible for checking the previous workers craftsmanship, and details like needle holes are thoroughly and constantly inspected.**

***We of course also welcome any third party inspection company to inspect goods before they leave our factory!***
