E740 SCANNER SETUP GUIDE

Product Description

Charge the scanner

Connect Scanner with your host through USB cable (provided by Netum) or take a DC plug and charge it on an electrical wall outlet.

- Red Light - Charging
- Green Light - Fully charged
- Important Notes: DC Plug: V: 5V; A>500mA

Warning Tone

Low battery warning - 2 beeps, LED in red flashing twice
Running out of battery - 5 beeps, LED in red flashing 5 times
Scanning will not read any barcodes when it's running out of battery.

Get Battery Volume

By scanning below command barcode will get rough battery volume.

Firmware Version

Read below command barcode to check scanner firmware version.

Barcode Programming

Netum barcode scanners are factory programmed for the most common terminal and communications settings. If you need to change these settings, programming is accomplished by scanning the bar codes in this guide. An asterisk (*) next to an option indicates the default setting.

Connection Way

Characters can be transmitted to your device via bluetooth, USB receiver or USB cable after each scanning, you can choose one of the connection ways to connect scanner with your device.

USB Wired Connection

1. USB HID Wired Connection

By default, the scanner is in HID mode as a Keyboard device. It works on a Plug and Play basis and no driver is required.

Steps on how to transmit characters via Type-C cable:

- 1) Connect scanner with your computer via type-C cable.
- 2) Press the power button.
- 3) Setup keyboard language, refer to page 9.
- 4) Locate cursor on the place where you want scanner to output the characters then you can start to scan.

*USB Cable as Keyboard (HID)

2. USB COM Port Emulation

If you connect scanner to the Host via a USB connection, by scanning below command barcode the USB COM Port Emulation feature allows the host to receive data in the way as a serial port does (no driver need for win 10 or above).

USB Cable as Virtual COM

USB Wireless Connection

1. USB Wireless connection (HID Mode)

Steps on how to transmit characters via USB Dongle (HID Mode):

- 1) Plug USB dongle into your computer.
- 2) Press the power button.
- 3) Setup keyboard language, refer to page 9.
- 4) Locate cursor on the place where you want scanner to output the characters then you can start to scan.

*USB Dongle as Keyboard(HID)

2. USB DONGLE AS VIRTUAL COM

Plug the USB dongle into your device, by scanning below command barcode, the USB COM Port Emulation feature will allow the host to receive data in the way as a serial port does. (no driver need for win 10 or above).

USB Dongle as Virtual COM

Bluetooth Connection

Steps on how to transmit characters via bluetooth HID mode:

- 1) Press power button.
- 2) Scan “Bluetooth Transmit”.
- 3) Turn host device’s Bluetooth on and find “E barcode scanner” from your bluetooth list, tap it and pair.
- 4) Setup keyboard language, refer to page 9.
- 5) Locate cursor on the place where you want scanner to output characters then you can start to scan.

Important Notes:

Make sure the device is in range with Bluetooth turned on.

If a connection is made, the blue light will stop blinking and turn solid.

If a connection is not made after several attempts, the scanner will emit a long beep (and the blue light will turn off).

Bluetooth Transmit

1. Bluetooth Basic Mode (HID) *

- NO software installation needed
- Connects to most devices
- Scanner interacts with host device like a keyboard

AT+MODE=2

2. Application Mode (Apple Specific Serial Profile)

- For iOS Devices
- If you have an iOS application that supports our Scanners this is the mode to use.

AT+MODE=3

3. Application Mode (Serial Port Profile)

- For Android or Windows
- Software installation is required.
- If you have an application that supports this is the mode recommended.

AT+MODE=1

Transmission Speed Via Bluetooth Connection

By scanning the appropriate barcode will change bluetooth transmit speed.

AT+HIDDLY=10
High transmit speed

AT+HIDDLY=45
Low transmit Speed

Scanning Mode:

*Trigger Mode (Default)

Scanning this bar code will enable the scanner to enter manual trigger mode.

Trigger Mode

Auto Sense Mode

Scanning this bar code will enable the scanner to enter auto sense mode.

Auto Sense Mode

Continuous Mode

This mode enables the engine to scan/capture, decode and transmit over and over again.

Continuous Mode

Keyboard Language

For example If you use French Keyboard, scan command barcode of “French keyboard ”. If you use a US keyboard you can ignore this step.

* America EN keyboard

French keyboard

Germany keyboard

Italy keyboard

Portugal keyboard

Data Uploading Mode

If you are heading for a working area which lies outside the Bluetooth signal range, you may activate scanner's store mode, following steps described below. Under this mode, all scanned data will be stored directly into the buffer memory of the device. Furthermore, the data entries will be permanently saved in the buffer memory prior to the manual upload into the working station, so that you may upload them when you are near your working device.

Quit Offline Mode

By scanning the following barcode, the device leaves the offline mode, normal mode will be reinitialised.

*Quit Offline Mode

Offline Mode

By scanning the following barcode, the offline mode will be activated

Offline Mode

Output Stored Data

By scanning the following barcode, all data entries in the buffer memory can be manually uploaded after reconnecting to the working station.

Output Stored Data

Output Total Entry

By scanning the following barcode, the gross quantity of the uploaded data entries will be summarised .

Output Total Entry

Clear Memory

By scanning the following barcode, all data in the buffer memory will be deleted.

Clear Memory

Get Battery Volume

Scan below command barcode to get battery rough volume

%BAT_VOL#

Battery Rough Volume

Idle time

Scanner will turn to sleep after idle/inactive for 1min

Scan "Disable module Idle time" before you doing any other setup from this section.

\$POWER#OFF

Power Off

* Disable Convert Case

Up Low Case Swap (A<->a)

All Upper Case (a->A)

All Lower Case (A->a)

Terminator

The scanner provides a shortcut for setting the terminating character suffix to CR or CRLF and enabling it by scanning the appropriate barcode below.

None

CR&LF

CR

TAB

IOS Keyboard POP UP/HIDE

During the scanning IOS keyboard can be hided or popped up by scanning below command barcode.

Beeper

Enable/Disable scanner to beep to indicate successful scan.

\$BUZZ#0

BEEP OFF

\$BUZZ#1

*High Volume

\$BUZZ#2

Middle Volume

\$BUZZ#3

Low Volume

Restore factory default

Scanning the following barcodes one by one to restore the scanner to factory defaults. (Four steps included)

1. Factory Restore

2. Serial Port

3. Baud Rate 19200

4. Enter+LF

Transmit Code ID Character

A code ID character identifies the code type of a scanned bar code. This can be useful when decoding more than one code type. The code ID character is inserted between the prefix character (if selected) and the decoded symbol. (Refer to Appendix A)

01400
Disable Code ID*

01401

Hide Prefix or suffix digits

The start/middle/end of barcode chars can be hidden. After scan below hide set barcode, scan a double-digit hexadecimal number that you want to hide char length(00~FF e.g. hide length 4, scan 0, 4).

Hide Barcode Start Chars

Hide Barcode Middle Char Start

Hide Barcode Middle Chars

Hide Barcode End Chars

Output Format

To change the Scan Data Transmission Format, scan one of the eight bar codes corresponding to the desired format.

Enable Hide Barcode Start Char

Enable Hide Barcode Middle Char

Enable Hide Barcode End Char

To Hide chars of barcode Start/Middle/End:

Steps:

1. Scan the Hide Barcode Start / Middle Start / Middle length / End Chars symbol.
2. Determine the hex value for the length you wish to enter(hide 4 chars, scan 0,4; hide 12 chars, scan 0,C).
3. Scan the 2 digit hex value from the **Numeric Bar Codes**
4. Scan the output format to enable or cancel hide char function.

Custom prefix and suffix

Maximum 20 prefixes and 20 suffixes can be added to scan data for use in data editing. To set these values, scan a double-digit hexadecimal number (i.e. two bar codes) that corresponds to ASCII values. See the [Table 1](#) and [Numeric Bar Codes](#) in appendix.

To Add a Prefix or Suffix:

1. Scan command barcode of " Add Prefix" or" Add Suffix ".
2. Check the prefix or suffix hex value from the ASCII Chart.
3. Scan the 2 digit hex value from the Numeric Bar Codes
4. Repeat Steps 2 and 3 for all the prefix or suffix that you want to add.
5. Scan the output format to enable or disable prefix/suffix output.

Add Prefix

Add Suffix

\$NO#7

Output Format

To change the Scan Data Transmission Format, scan one of the eight bar codes corresponding to the desired format.

\$DATA#0

*Default output format

\$DATA#1

Enable Suffix output

\$DATA#2

Enable Prefix output

Example on how to add normal prefix or suffix on barcode "123456789"

123456789

Add "A" and "B" as prefixes and "!" as suffix

1. Scan command barcode of " Add Prefix"

\$SCAN#2

2. Check the prefix hex value from the ASCII Chart. A- "4", "1"; B-"4" "2";
3. Scan the 2 digit hex value from the Numeric Bar Codes

\$NO#4

\$NO#1

\$NO#4

\$NO#2

4. Scan the output format to enable prefix output.

Enable Prefix output

5. Scan command barcode of " Add Suffix" to add "!" as suffix.

Add Suffix

6. Check the suffix hex value from the ASCII Chart. !- "2" "1"

7. Scan the 2 digit hex value from the Numeric Bar Codes.

8. Scan the output format to enable suffix output.

Enable Suffix output

9. Scan the barcode then you will get **AB123456789!**

Example on how to add Combination Key suffix for barcode "123456789"

Add "Ctrl+P" on "123456789" as suffix

1. Scan command barcode of " Add Suffix" to add "Ctrl+P" as suffix.

\$SCAN#1

Add Suffix

2. Check the suffix hex value from the ASCII Chart. **Ctrl+P - "9" "7" "5" "0"**

3. Scan the 4 digits hex value from the Numeric Bar Codes.

\$NO#9

\$NO#7

\$NO#5

\$NO#0

4. Scan the output format to enable suffix output.

\$DATA#1

Enable Suffix output

5. Scan the barcode **123456789**. (test it on notepad)
