GJ3 Glass Horizontal Drilling Machine

GJ3

1. General Description:

1. GJ3 is equipped with three sets of drill bit spindles, with high production efficiency;
2. Allows for 3 different size drill bits to be installed at one time, for most of the holes on glass;
3. The foot print of one machine instead of three single drilling machines;
4. Simple structure leads to simple maintenance and very easy operation;
5. Use it as a tool but not a complex machine, no need for a professional technician to maintain it.
6. Stable performance, simple operation, no vibration, low noise, and simple adjustment;
7. Top heads are manual while bottom heads are automatic, can be used for scattered and mass production;
8. Each station has the option of only using the glass clamping function which allows you to use the drilling machine as a working table to cut, notch or grind the glass.

2. Technical Parameter:

- 2.1. Max. size of processing: 2200x3000
- 2.2. Processing thickness: 3~40mm
- 2.3. Hole diameter: $\varnothing 5 \sim \varnothing 110$ mm
- 2.4. Weight: 950KG
- 2.5. Power: 9KW
- 2.6. Size: 2200*2000*1600mm
- 2.7. Height of working table: 1000mm
