UV Offset Printing Ink

310-UV

310-LED

Features

- The thicker ink layer can be cured at one time, and the thickness can reach 100~150um.
- Short curing time, low energy consumption, saving printing space and space, and high production efficiency.
- The printed matter is exquisite, good quality, high-grade, and the cured ink film has good heat resistance, solvent resistance and scratch resistance.

Application (Paper)

UV Offset Printing Ink

316-UV

316-LED

Features

- Instant curing, fast printing speed
- Good adhesion fastness
- Good printability, excellent print performance
- Meets environmental protection requirements
- Suitable for printing on heat-sensitive substrates

Application [Paper and film(PP,PE,PVC)]

UV Offset Ink for Card **YY-319J-CD**

High concentration

Color saturation

Good adhesion

Wear-resisting

Application

UV Offset Ink for Plastic Cup **YY-317J-CP**

High concentration

Color saturation

Good adhesion

Wear-resisting

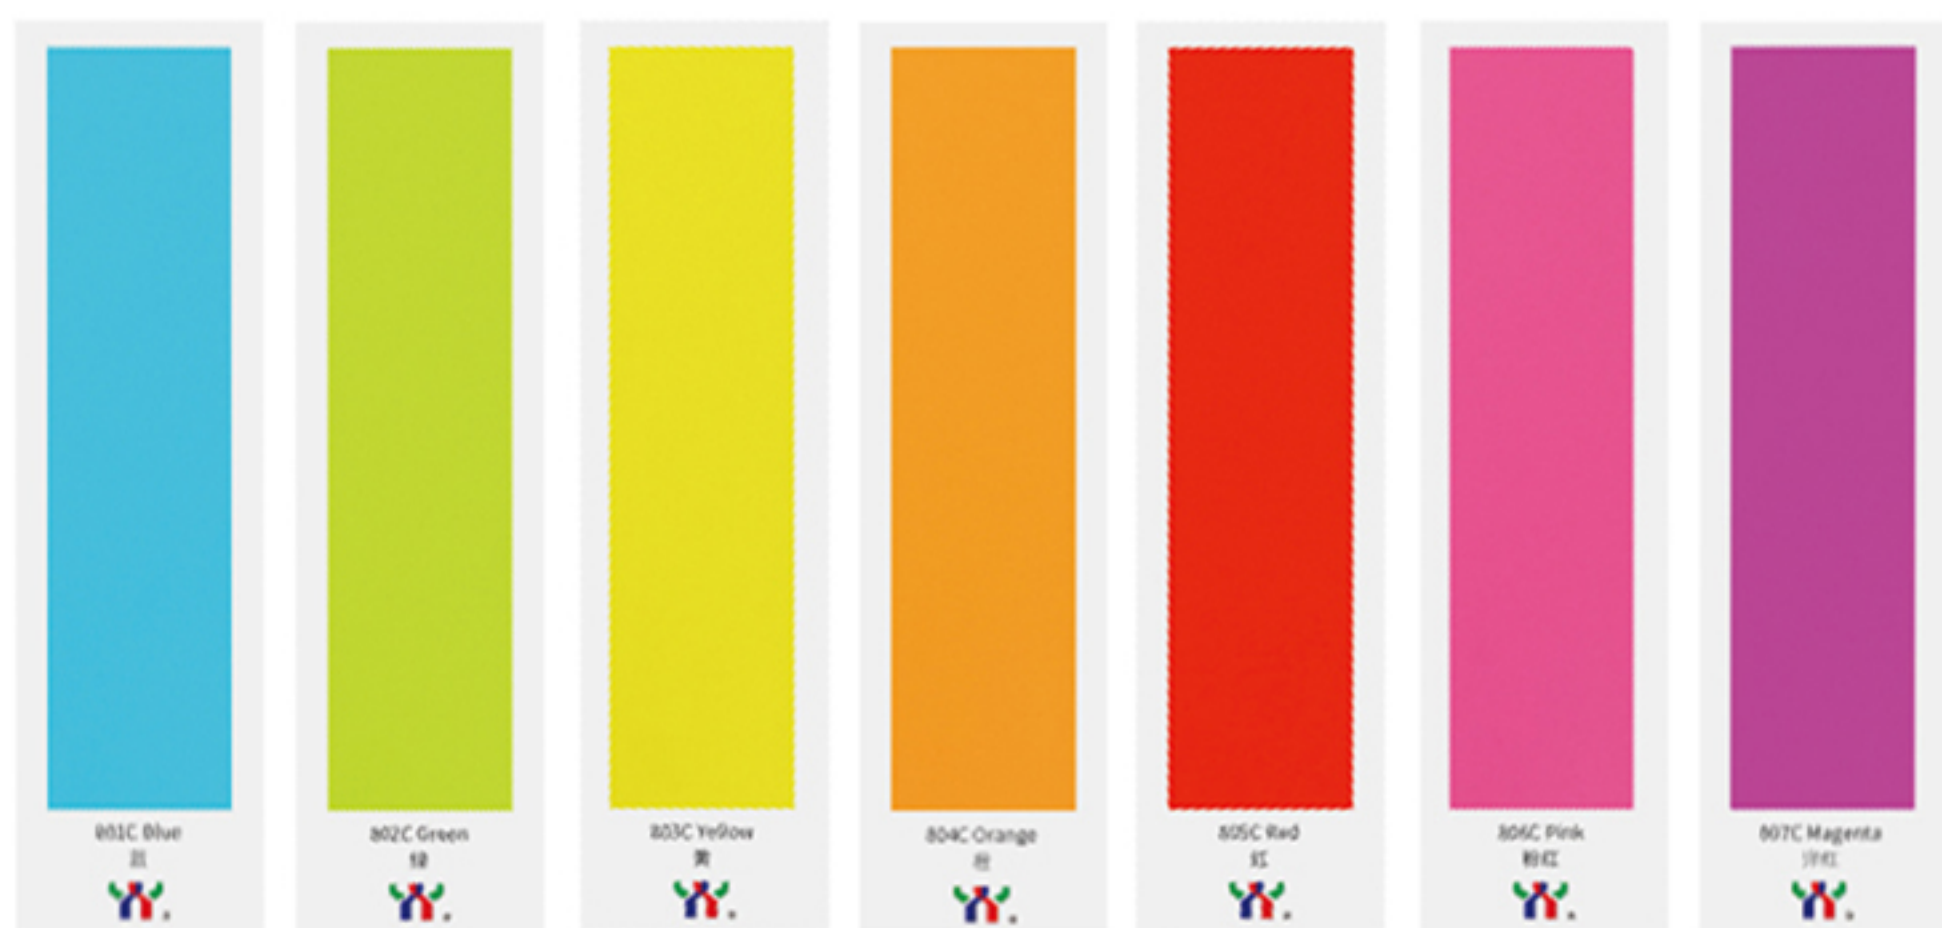

Application

UV Pantone Spot Color Series

UV / LED Offset Fluorescent Ink

Can be graded according to Pantone color number

YT-02 Offset Ink — High Brightness

High Color Density
and Quick Dry

Water and Rub Resistance

High Gloss

Environmental Protection

Production Workshop

YT-03 Offset Ink — Quick Drying

High Gloss

Water and Rub Resistance

High Color Density and Quick Dry

Environmental Protection

Ink on the Machine

YT-09 Offset Ink — Eco-friendly Ink

High Gloss

Water and Rub
Resistance

High Color Density
and Quick Dry

Application

Food Wrapping Paper

Children's Book

Magazine

YT-06 Offset Ink — Melamine Ink

A-1 Offset Ink — Economic Ink

- High Gloss
- High Color Density and Quick Dry
- Water and Rub Resistance
- Economy

Offset Fluorescent Ink

Auxiliary Ink

Description	Feature	Packaging	Picture
YT-300 Primer Coating for Paper	<ul style="list-style-type: none"> Remedy the power dropping, wrinkle and other quality problem of the paper. Improve printing quality 	2.5Kg/Can 6Cans/Carton	
YT-500 Matt OP Varnish	<ul style="list-style-type: none"> Excellent matt effect Fast drying High transparency 	2.5Kg/Can 6Cans/Carton	

<p>YT-660 Gloss OP Varnish</p>	<ul style="list-style-type: none"> • Higher mirror surface effect and fast drying. • High transparency and tenacity and not easy to turn yellow. 	<p>2.5Kg/Can 6Cans/Carton</p>	
<p>YT-901 Clear Medium</p>	<ul style="list-style-type: none"> • High transparency and gloss • Not easy to yellow 	<p>2.5Kg/Can 6Cans/Carton</p>	
<p>YT-902 JellyCompound</p>	<ul style="list-style-type: none"> • Reduce the viscosity of the ink efficiently. • Transparent jelly condition. 	<p>2Kg/Can 6Cans/Carton</p>	
<p>YT-903 Varnish</p>	<ul style="list-style-type: none"> • Reduce the viscosity of the ink efficiently. • Promote the glosses and fast drying. 	<p>3Kg/Can</p>	
<p>YT-917 Special Black</p>	<ul style="list-style-type: none"> • High concentration, super black and high gloss. • Rich layering, good reapppearance dot. 	<p>1Kg/Can 12Cans/Carton</p>	
<p>YT-919 White</p>	<ul style="list-style-type: none"> • Super White, outstanding hiding power. • Not yellowing after printing. 	<p>1.5Kg/Can 12Cans/Carton</p>	

UV Varnish

YY-588 UV Varnish (Coated)

YY-609 UV Varnish (Not Coated)

Application

Production Workshop

The Best Partner

Ceres 200
UV Drip off Primer

Ceres 100
UV Drip off Varnish

Features

1. Go directly hot stamping after printing.
2. Exquisite line 0.10mm perfect performance.
3. Lines interval could be controlled to a minimum 0.10mm.

• Low Odor, Good Flexibility.

• Reduce the production cost, earn more profits.

Metal Decorating Ink

Features

- Strong adhesion to metal sheets
- Very good solvent resistance
- Very good Light resistance
- Very good Baking resistance
- Very good Cooking resistance

Application

Two-piece
Cans

Juice

Drink

Beer

Three-piece
Cans

Spray

Snack

Drink

Desensitizing Ink / Sensitizing Ink

Feature

Sensitizing Ink : Use it on the surface of the confidential area that needs to be copied to enhance its color rendering ability.

Desensitizing Ink : When printing with pressure-sensitive carbonless copy paper, there will be no handwriting on the ink surface, which can reduce the sensitivity.

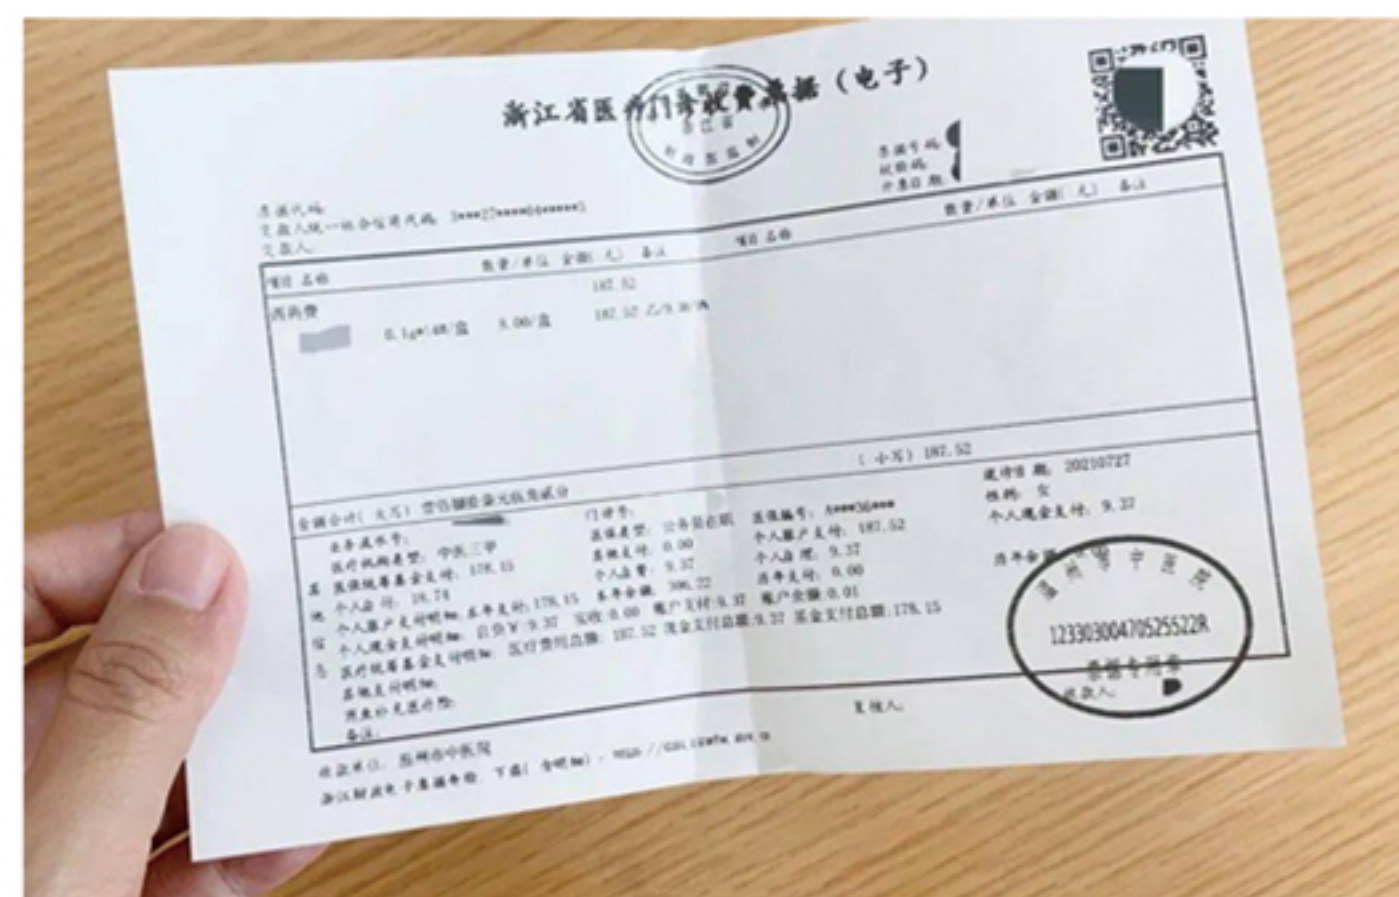

Desensitizing Ink

Sensitizing Ink

Application : Generally used in the processing of carbonless copy paper. Such as: courier bills, receipts, invoices, etc.

Sublimation Ink

Sublimation transfer printing process printing pattern layers are rich, bright colors, ever-changing, small color difference, good reproducibility, the image will not fall off, crack and fade, and wear resistant, fast sun, so sublimation heat transfer products have the advantages of durability.

Printing materials: coated paper, coated paper, offset paper, card paper

Application

1. Advertising display: Used for mass printing of flags and banners.
2. Light industrial products: used for (shoes, hats, boxes, bags, umbrellas, ties) printing, clothing accessories, ribbon printing and other professional fields.
3. Product manufacturing: cups, plates, tiles (surface need to be coated with acrylic baking paint).
4. Craft products: key chain, couple cup, mobile phone cover, throw pillow, etc.
5. Clothing processing fabric pattern transfer: fabric printing and dyeing, sportswear, swimsuit, non-woven fabric, T-shirt, etc.

Company Profile

20+ Year Professional Experience In Printing Industry

160+ Countries Recognition

10000+ Customers Admire Our Service

One-stop Printing Materials Supplier

Our Friendship Lasts Forever
