

RD-A-01 AUTOPSY TABLE

ROUNDFIN is committed to serving funeral industry. Provide an excellent experience and efficient work for anatomical practitioners worldwide

■ INTRODUCTION:

Anatomy tables are very important safety equipment in pathological laboratory. Our autopsy tables are made of 304 stainless steel, waterproof and anti-corrosive. Styles and fittings could be customized according to different clients with different applications. Our anatomy tables are specially designed according to the construction requirements of medical colleges and hospitals' dissection laboratories. They provide a clean and safe sampling environment for the experimenters. With beautiful appearance, advanced technology and practical and complete functions, they are good and safe devices for anatomy. Field of application: Hospitals, public security, university health schools, livestock farms, quarantine bureau and so on.

■ FEATURE:

- 1: All 304 stainless steel construction.
- 2: Table height is adjustable from 720mm to 920mm. Work surfaces can rotate 40 degrees.
- 3: The powerful crusher under the pool can crush the broken objects after dissection and discharge them through the drain.
- 4: There is a hair separator in the pool to prevent hair from entering the drainage pipe and blocking the pipe.
- 5: Negative pressure ventilation system: the upper ventilation is inhaled downward from the inclined ventilation openings on both sides of the inner side of the table, and the lower ventilation is inhaled through the openings around the base, which can extract the harmful gas leaked during the dissection process in time (the external ventilation system needs to be connected).
- 6: Equipped with hot and cold regulator, induction faucet and manual faucet (need to connect water heater).
- 7: The water pressure of the mobile spray and flushing gun can be adjusted to flush the dirt on the dissection table.
- 8: The table is equipped with a sieve isolation plate engraved with a laser scale. The table top can be turned over and detachable. The mobile plate on the table top can be used for organ placement during dissection.
- 9: There is leakage protection and waterproof socket on the side of the table. Easy to connect dissection tools
- 10: CE certification and customization accepted.

SPECIFICATION LIST:

Model No.	RD-A-01
Material	Stainless Steel 304
Product Size (mm)	L2600*W800*H800
Product Size (In)	L102.3*W31.5*H31.5
Table Height (adjustable) (mm)	720-920;By Motor
Table can rotate	40 degrees;Manual
The mobile spray gun length (mm)	2000
Pulverizer	Power: 560w
Pulverizer	Horsepower: 1.0hp
Pulverizer	Speed: 4200 r/Min
Pulverizer	Capacity: 1200ML
Emergency stop button	One (Control main power off)
Handheld remote	Yes
Voltage	220-240V/50Hz;Electricity 1.5A
Voltage	110-120V/60Hz (optional)
Load capacity	200KG
Package size (mm)	2630*830*830
Volume	1.8 CBM
Package:	Standard exporting ,plywood case
Optional functions	Removable organ viscera tray
Optional functions	Stainless steel corpse pillow
Optional functions	10 flushing heads on the side of the table
Optional functions	Autopsy saw
Optional functions	Dissection tabletop scale
Certification	CE
Customization	YES

USAGE SCENARIO:
