

NSF Certified Class II A2 Biological Safety Cabinet

Display for NA series

Display for GL series

Color Touch Screen

Touch operation, real-time and clearer display of various values and appointment timing function.

The front window glass can be lowered below the operating area

Exhaust Thimble canopy (Optional)

Footmaster Caster Universal caster with brake and leveling feet.

Stainless Steel I.V. Bar with 10 hooks

SS Water Tap &Gas Tap

Waterproof Socket

Wind Speed Sensor

Work Zone Unibody design

UV Lamp Emission of 253.7 nanometers for most efficient decontamination.

ADVANTAGE

- Motorized front window.
- 7-inch large touch color display: touch operation, real-time and clearer display of various values of the safety cabinet, dynamic air flow pattern diagram, fault alarm sound and light prompt.
- 3. The power-on password can be set to prevent mis-operation by irrelevant personnel.
- 4. EC Fan, automatically adjust the wind speed.
- With power-failure memory function, the state before power-failure will be restored after power-on and there will be visual prompts and alarms.
- 6. The integrated design of the operation area makes it easy to disassemble and clean.
- 7. The cabinet is separated from the base. The height of the adjustable base can be customized.
- 8. Interlocking function: UV lamp and front window; UV lamp and fan; fan and front window.
- It has the function of appointment timing, which can automatically set the time of starting and shutting down the safety cabinet and the running time of ultraviolet lamps, fan and sockets.
- 10. The front window closes the trigger signal, so that the sterilization and disinfection function of the ultraviolet lamp is normally turned on.
- 11. The one-piece hand resting surface has a larger contact area with the arm and is more comfortable.air speed adjustable with filter block.
