

Low Temperature Blood Operating Cabinet

Features:

- * The operating space features a sloped, trapezoidal structure for optimal ergonomics.
- * Microcomputer-based precision temperature control technology ensures high temperature accuracy, a real-time digital display of the tabletop temperature, over- and under-temperature alarms, and convenient parameter settings.
- * The product is equipped with a built-in multi-function socket for powering external devices to meet your work needs.
- * The tabletop is crafted from high-quality brushed stainless steel for an attractive appearance and enhanced ease of use and cleaning.
- * Protection for personnel: leakage current and overvoltage protectors are included.
- * Protection for samples: over- and under-temperature alarms are included.
- * Product self-protection: The compressor features delayed start and high-temperature protection.

Technical Parameters:

Model	BJPX-PX
Display	3.5-inch color LCD touch screen
Refrigerant	R290
Refrigeration Mode	Forced air cooling
Temperature Control Range	2~8℃
Temperature Display Resolution	0.1℃
Ambient Temperature	10~28℃
Refrigerating Chamber Size(L*W*H)	420*280*50mm
Timing Range	1~999min
Standard Accessories	Lamp, UV lamp, 10x observation mirror
Rated Power	800W
Power Supply	Standard: AC220V 50Hz; Optional: AC110V 50Hz, AC110V 60Hz
External Size(L*W*H)	1460*720*1570mm
Net Weight	185kg
Packing Size(L*W*H)	1620*880*1750mm
Gross Weight	235kg
