# **Blood and Fluid Warmer**

Introduction:

By heating the continuous flow of liquid, the heat in the heat exchanger is transferred to the liquid in the pipe through the extended infusion pipeline to achieve the purpose of heating the liquid. The product is not in contact with the liquid. It is not used for the heating of analysesics, chemotherapy drugs, insulin and other drugs.

Features:

sed for the heating of analg	esics chemotherapy dr		
eatures:	colos, elementary el	ago, modim and other drago.

Introduction:
This product is primarily used for warming and maintaining the temperature of fluids (Excluding analgesics, chemotherapy drugs and insulin) administered to the human body. (Non-contact with blood or medication)

- and insulin) administered to the human body. (Non-contact with blood or medication)

  Features:

  \* BK-TW110 is single-channel blood and fluid warmer, BK-TW210 is dual-channel blood and fluid warmer.

  \* Dry heating method, short preheating time, rapid heating.

  \* High-quality heating tube assembly, full-wrapped heating, fast heating in cold environment.

  \* Heating tube assembly is plug-and-play, convenient and fast.

  \* Directly heat conventional blood infransition and milision lines, no special consumables required, cost saving.

  \* Real-time display of set temperature, real-time temperature, alarm information, working status, etc.

  \* With over temperature alarm, under temperature alarm, no liquid alarm function.

  \*\*Technical Parameters:\*

Model	BK-TW110	BK-TW210	
Channel Count	Single-channel	Dual-channel	
Adjustable Temp. Range	32.0~42.0°C		
Temp. Accuracy	0.1°C		
Preheating Time	≤2min (From 20°C to 36°C)		
Display	LED		
Display Information	Heating time, set temperature, heating temperature, alarm information indication		
Inner Diameter	Standard: 3.5~5mm		
of Heating Tube	Optional: 6~7mm		
	The system has built-in alarm test function, a	nd the alarm function can be tested on the panel to	
Safety Control	see if it is normal		
Over-temperature Alarm	An alarm will sound if the actual temperature	of the heating pipe exceeds the preset temperature	
Over-temperature Alarm	by 2°C		
Under-temperature Alarm	An alarm will sound if the actual temperature of the heating pipe falls below the preset		
Onder-temperature Alarm	temperature by 3°C.		
	Three-cavity silicone flexible heating sleeve, integrated with 4 sets of heating wires, two sets of		
Heating Tube Structure	independent temperature sensors		
Power	60VA	80VA	
Power Supply	AC 100~240V, 50~60Hz		
External Size (W*D*H)	172*95*175mm	195*115*175mm	
Packing Size (W*D*H)	250*220*230mm		
Net Weight	1.7kg	2.3kg	
Gross Weight	2.1kg	2.7kg
