

Large Capacity Vertical Type Shaking Incubator (Double Door & Double Layer)

Features:

- * The first cutting-edge USB data recording system. The data of the whole experiment process was automatically recorded.
- * U disk to record the whole process of experimental data (temperature, speed, time can be recorded).
- * Download data automatically tabulated to save and print. Mouse click to easily replay the experiment process. It is convenient to optimize reaction conditions, screen experimental methods, and confirm the experimental process.
- * Multi-section speed, temperature, time control system. A variety of different speed, temperature and time experimental modes can be set at one time, and the operation mode can be automatically changed during operation.
- * Super low speed start, the speed is out of control, automatic lock, adjustable starting speed. Unique dynamic balance design to ensure smooth operation.
- * Silent fan design, forced convection mode and unique air duct design ensure good temperature uniformity.
- * Automatic refrigeration mode, using environmentally friendly refrigerant, can automatically adjust the opening and closing of the refrigeration system according to the change of environmental temperature, without manual operation. (Refrigeration type)
- * Intelligent refrigeration frost-free operation technology, automatic defrosting function, defrosting time and defrosting interval can be set freely, so that the equipment can run stably for a long time under low temperature. And has the refrigeration delay start function, effectively protect the compressor. (Refrigeration type)
- * Users can freely set three operation modes: forward, reverse and forward and reverse.
- * LCD liquid crystal display, temperature, time, speed with the interface display.
