

Soil&Plant&Seed Instruments Solution
 Soil Auger Kits

Introduction:

Soil auger kits contains a complete set of soil borrowing accessories, which can be used to drill disturbed soil samples within 1-2 meters in soft soil areas or to drill 1-2 meters deep holes. Soil auger is one of the main tools for collecting soil samples. The reliability, ease of operation and mobility of the borrow drill can not only reduce the workload of soil investigation, improve the efficiency of soil borrowing, but also expand the adaptability of soil sampling.

Features:

- * The sampler is made of stainless steel, without pollution to sample.
- * Pedal type, more convenient, fast, reduce the labor intensity.
- * Take 15-20cm of the soil samples each time.
- * The material is hard and the shape is not easy to be bent and twisted.
- * The exterior of the soil sampler is marked with scale values, each scale is 100mm, which provides a reference for taking soil samples of different depths.
- * The soil sampling head, the connecting pipe and the handle are all connected by thread, which does not occupy the volume after disassembly, and is convenient for transportation.
- * When it is necessary to measure soil moisture data, it can be used as the connecting rod of the soil moisture sensor.
- * The depth of sampling is: 1m, 1.5m, 2m.
