

## Large Capacity Vertical Type Shaking Incubator (Double Door & Double Layer)

### Features:

- \* Multi-section speed, temperature, time control system. A variety of different speed, temperature and time experimental modes can be set at one time, and the operation mode can be automatically changed during operation.
- \* Super low speed start, the speed is out of control, automatic lock, adjustable starting speed. Unique dynamic balance design to ensure smooth operation.
- \* Silent fan design, forced convection mode and unique air duct design ensure good temperature uniformity.
- \* Automatic refrigeration mode, using environmentally friendly refrigerant, can automatically adjust the opening and closing of the refrigeration system according to the change of environmental temperature, without manual operation. (Refrigeration type)
- \* Intelligent refrigeration frost-free operation technology, automatic defrosting function, defrosting time and defrosting interval can be set freely, so that the equipment can run stably for a long time under low temperature. And has the refrigeration delay start function, effectively protect the compressor. (Refrigeration type)
- \* Users can freely set three operation modes: forward, reverse and forward and reverse.
- \* LCD liquid crystal display, temperature, time, speed with the interface display.
