

Balance Table

Features:

- * This table is designed as a scale of 1/100,000, with a three-stage shock absorber, which can absorb most of the vibration in the environment more widely.
- * The use of 60mm thick granite countertops can eliminate 3-10 Hz vibration in the environment.
- * 85-degree shock-absorbing rubber press-molded adjustment pad; can eliminate 18-32 Hz vibration in the environment.
- * The lower part of the whole cabinet is made of 15mm thick rubber soft foot pads, which can effectively reduce the vibration caused by the bottom plate.

Technical Parameters:

| Model | BK-BLT01 |
|-------------------|--|
| Cabinet Material | Electrostatic spraying of epoxy resin for high temperature cured steel plate |
| Cabinet Thickness | 1.0mm |
| Tabletop | 60mm thick granite&12.7mm thick solid core physicochemical board |
| Socket | 1pc 10A Multifunctional Splashproof Socket |
| Dimension | 900*600*800mm |
| Net Weight | 55kg |
| Packing Size | 950*620*900mm |
| Gross Weight | 75kg |
