

Bed Unit Ozone Sterilizer

Suitable for disinfection of bed sheets, quilt covers, pillowcases, pillow inserts, mattresses, and operating room clothing. It is widely used in hospital wards, nursing homes, welfare homes, hotels and other important places.

Features:

- * The shell is ABS material that does not hide dirt. It comes with a medical silent caster, making it easy to move.
- * Controlled by a microcomputer, adopts a 7-inch capacitive LCD screen, that is sensitive to touch, long service life, and convenient for human-computer interaction.
- * It can disinfect both beds at the same time, with a high sterilization rate, and can whiten, deodorize, and repel insects.
- * There are custom mode, bed bag mode, and bedspread mode to chose from.
- * Built-in a high concentration quartz ozone generator, it has a longer and more stable lifespan.

Technical Parameters:

Model	BKCDW-Y-3G
Installation Method	Mobile
Disinfection Power	≤200W
Compression Power	≤1200W
Disinfection Method	Ozone
Ozone Generation	3g/h
Ozone Concentration	≤627.6mg/m ³
Pump-out Time	120s (Customizable)
Ozone Filling Time	20min (Customizable)
Disinfection Time	90min (Customizable)
Parsing Time	240s (Customizable)
Power Supply	AC220V 50/60Hz
External Size (W*D*H)	460*360*940mm
Net Weight	26.5kg
Package Size (W*D*H)	534*434*1144mm
Gross Weight	34kg
