

Bunsen Burner

Introduction:

Bunsen burner is a high-temperature heating tool commonly used in scientific laboratories, mainly used for heating, sterilization and combustion. The Bunsen burner burns gas fuel safely without the flame flowing back into the gas supply pipe.

Technical Parameters:

Model	BSN-01
Package Weight(W*D*H)	250*210*90mm
Net Weight	2kg
Gross Weight	3kg

Standard package: 10units/carton
