

Digital Display Compression Testing Machine

Application:

BK-YES2000 Digital Display Compression Testing Machine mainly used for concrete and other material compression resist testing.

Widely used in metallurgy, building materials, space flight and aviation, colleges and universities, R&D institution lines. The test operation and data processing meets standard requirements

Technical Parameters:

Model	BK-YES2000
Max. Load	2000 KN
Class	1 Class
Testing Space Regulating Way	Manual Ball Screw Adjust
Control Way	Manual Control Load Way
Oil Source Control Cabinet Structure Form	One-piece Bench Oil Source Control Cabinet
Range Of Test Force	4%~100% FS (80KN~2000KN)
Indicating Value Accuracy	±1%
Piston Stroke	50mm
The Largest Spacing Of Upper And Lower Pressure Plate	320mm
The Largest Spacing Of Two Columns	270mm
Pressure Plates Size	250*250mm (L*W)
Display	LCD Digital Display
The Host Dimension	900*400*1150mm
Power Supply	1KW / AC 380V, 50Hz (Can Be Custom)
Weight	750 kg
