

## Infrared Sterilizer

### Features:

- \* The infrared sterilizer is safe and convenient, can completely replace the alcohol lamp and can be used in an oxygen-free environment
- \* The sterilization temperature can be reached within 15 minutes after startup and the sterilization work can be completed in only 2-5 seconds
- \* Small size, light weight, easy to clean and long service life
- \* There is ash-like organic matter deep in the ceramic funnel pipe to prevent infectious splashing and cross contamination
- \* Effectively prevent infectious splashing and cross contamination

### Technical Parameters:

Model	BK-HM35	BK-HM15
Heating Diameter	φ35mm	φ15mm
Sterilizable Caliber	≤35mm	≤15mm
Adjustable Angle	Elevation 30° - Depression 45°	
Heating Time	Less than 15 minutes	
Material	High quality composite aluminum ceramics	
Setting Time	3-level: 400°C, 620°C, 840°C	
Temp. Deviation	≤25°C	
Power	240W	
Power Supply	Standard: AC220V 50/60Hz, optional: AC110V 50/60Hz	
Net Weight	1.2kg	1.0kg
Packing Size	300*250*200mm	
Gross Weight	1.5kg	1.3kg
