

Intelligent Mobile Cold Storage

Features:

- * The container has a high structural strength and can be hoisted as a whole when fully loaded.
- * The built-in evaporator structure, with air outlet at the bottom and air return at the top, saves storage space and has good refrigeration uniformity.
- * The container is monitored throughout the process, which can realize remote control, temperature checking, alarm, intelligent and convenient.
- * It adopts a refrigerated container with an integrated structure, which is beautiful and easy to transport.
- * The interior is made of stainless steel, and the floor is a T-shaped aluminum plate, which is clean and hygienic with high strength. The board is high-density foamed with good thermal insulation performance.
