

MAGNETIC SLIMMING

Focusing electromagnetic wave HI-EMT technology helps you strengthen muscle / reduce fat / get in shape easily.

14 inches high resolution intelligent display

Strengthen muscle and burn fat

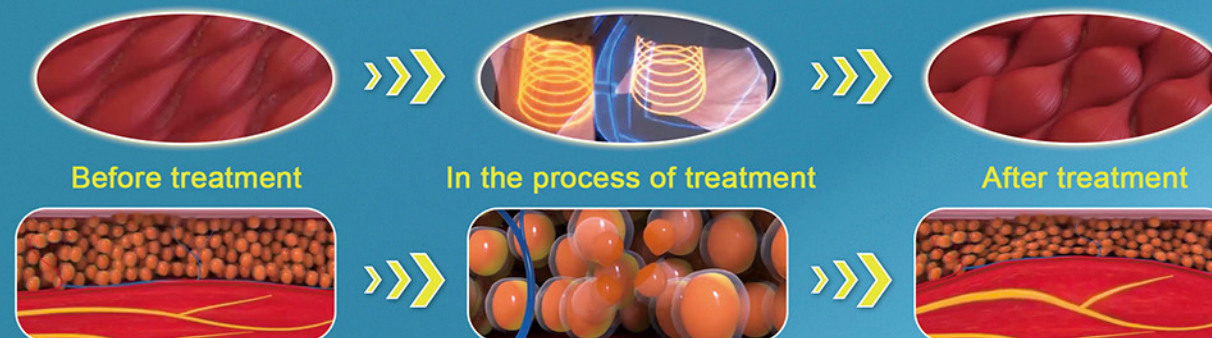

Lose fat without losing chest

Build peach rump

Build firm abs and V line abs

Technical Principle:

Surpass-20A uses non-traumatic high-energy focused electromagnetic wave HI-EMT technology through the electromagnetic field output energy. It can stimulate the body muscle motor neurons, trigger the muscle high-strength contraction muscle. In the process of strong contraction, make part of the muscle fibers break, so that the muscle can be remodeling. HI-EMT technology 100% muscle contraction can push a lot of fat decomposition by the body's normal metabolism, reduce the thickness of fat effectively.

Advantages:

Muscle density becomes higher

1. Safe and comfortable, non-invasive, no sweat, no heat therapy, no radiation.
2. Stable performance, dual power supply and dual handle independent power supply.
3. Time-saving and efficient, lying down for 30 minutes equals 20,000 muscle contractions, you can leave as soon as you're done.
4. Durable, equipped with an all-metal casing, branded hoses and extra-wide straps.

Dual power supply and dual handle

Innovative patented plug

Technical Parameters:

Model	Surpass-20A
Power Supply	AC100~240V, 50/60Hz
Output Frequency	40Hz (220V) 、 25Hz (110V)
Output Power	2000w
Electromagnetic Wave Energy	0~7T
Net Weight	37KG
Gross Weight	58.5KG
External Size(W*D*H)	540*380*1310mm
Package Size(W*D*H)	458*650*1052mm
Guarantee Period	1 year
