

Medical Vending Machine

- Introduction:**

Medical vending machine is an intelligent device designed to serve hospital patients, operating 24/7 to deliver an efficient and convenient self-service purchasing experience. With a simple and intuitive process, users can select desired items via the high-definition touchscreen, confirm their choices, and complete the transaction by scanning a code for payment, followed by immediate product retrieval. This eliminates waiting time, significantly reduces queues, and enhances purchasing efficiency.
- Features:**
  - \* 41 storage channels, 4 different sizes of storage channel.
  - \* 18.5-inch smart touch screen, the operation is intuitive and simple.
  - \* Perspective window design, pick it up and take it away immediately.
  - \* Customizable services can meet various requirements.
  - \* The machine runs 24/7, offering hospital patients an efficient, self-service purchasing experience that is entirely attendant-free and on-demand.
  - \* Upon successful payment, the machine's compartment door will open automatically and the screen will display a purchase confirmation message along with the after-sales service phone number.
