

Oil Bath

Application:

Widely used in scientific research, colleges and other enterprises and institutions laboratory distillation, drying, concentration, temperature stain chemical or biological products, can also be used for constant temperature testing experiments and auxiliary heating.

Features:

- * The inner liner is made of stainless steel plate and precision machining technology
- * High temperature and corrosion resistance
- * Short heat balance time and small temperature fluctuation
- * LED display of test data, intuitive and accurate

Technical Parameters:

Model	BJPX-OB2
Temperature Control Range	RT+5~300°C
Temperature Fluctuation	≤1°C
Power	600W
Capacity	3.54L
Heating Medium	High temperature thermal oil or distilled water
Power Supply	Standard: 220V 50/60Hz, optional: 110V 50/60Hz
External Size	235*265*190mm
Packing Size	330*330*300mm
Gross Weight	4kg
