

Platelet Agitator

Introduction:

This machine is suitable for the mixture of blood bags, emulsion reaction and complement fixation reaction, while can also be used to blends of clinical biochemical tests. It has the characters of stability and easy for operation, which is applicable to hospitals, educational study units, sexual disease prevention centers, infection prevention stations, and blood collection stations , its plates Stainless steel, allowing a perfect homogenization and a good ventilation of the pockets .When the machine center of gravity be unsteady issued a report to alarm.

Technical Parameters:

Model	BPA-B48
Motion Type	Reciprocating
Capacity	48 bags
Platform(mm)	350*350*8 layers
Speed Range	50~70rpm
Timer	0~999min
Amplitude	20mm
Power Supply	220V±10%, 50Hz
External Size(L*W*H)mm	390*380*470mm
Package Size(L*W*H)mm	500*500*530mm
Net Weight	20kg
Gross Weight	32kg
