

## Saddle Chair

### Features:

- \* Shape a healthy sitting posture and keep the body's physiological curvature as S shape.
- \* Reduce sitting fatigue, the unique shape of the saddle chair keeps the thigh and torso at 135 degrees, effectively reducing the pressure on the spine and sciatic nerves.
- \* Slightly rocking saddle chair, the chair surface can tilt 15 degrees in any direction of 360 degrees, when people need to tilt the body, the chair surface will adapt to the human sitting posture synchronous automatic tilt, always provide support.

### Technical Parameters:

Model	BK-SC01
Chair Surface	Polyurethane bulk foaming
Chassis	Dual function chassis, lift, forward tilt
Gas Rod	Diameter 38mm, three level gas rod, passed SGS, TUV safety certification
Five Star Foot	Aluminum alloy die casting
Wheels	PU wheels
Function	Chair front tilt, lift, slide, rotate
Chair Surface Size	420*380mm
Five Star Foot Size	Diameter 480mm
Lifting Range	510-650mm
Net Weight	9.5kg
Packing Size	520*520*320mm
Gross Weight	10.5kg
